Influenza Surveillance Report: Collin County* **MMWR Week 17 (April 21 – April 27, 2024)** Influenza Report as of May 03, 2024

Data included in this report is submitted on a voluntary basis and should not be considered comprehensive. Only novel influenza A, outbreaks/unusual group expression of influenza and influenza-associated pediatric mortalities are reportable in the State of Texas, all other influenza reporting is voluntary.

Please note: The COVID-19 pandemic is affecting healthcare seeking behavior, which impacts data used for ILI surveillance.

Overview

Collin County

- Influenza activity in Collin County is low.
- 1.4% of patient visits to health care facilities captured through syndromic surveillance were due to influenza-like illness (ILI).
- No influenza-associated pediatric deaths were reported this week. Total this season: 0

Texas

- Influenza activity in Texas is minimal ([based on CDC ILI indicator](#)).
- 2.7% of patient visits to health care facilities were due to ILI, which is below baseline (4.3%).
- One influenza-associated pediatric death was reported this week. Total this season: 9

United States

- Seasonal influenza activity continues to decrease nationally.
- 2.2% of patient visits to health care facilities were due to ILI, which is below baseline (2.9%)
- 10 influenza-associated pediatric deaths were reported this week. Total this season: 158

Influenza Activity

Table I. below demonstrates the number of influenza tests performed by participating healthcare providers and the total number of tests that were positive. This table shows the cumulative totals for the season and breaks down the current week. Figure I. below displays the number of positive influenza cases and percent positivity for the current 2023-2024 flu season by MMWR week.

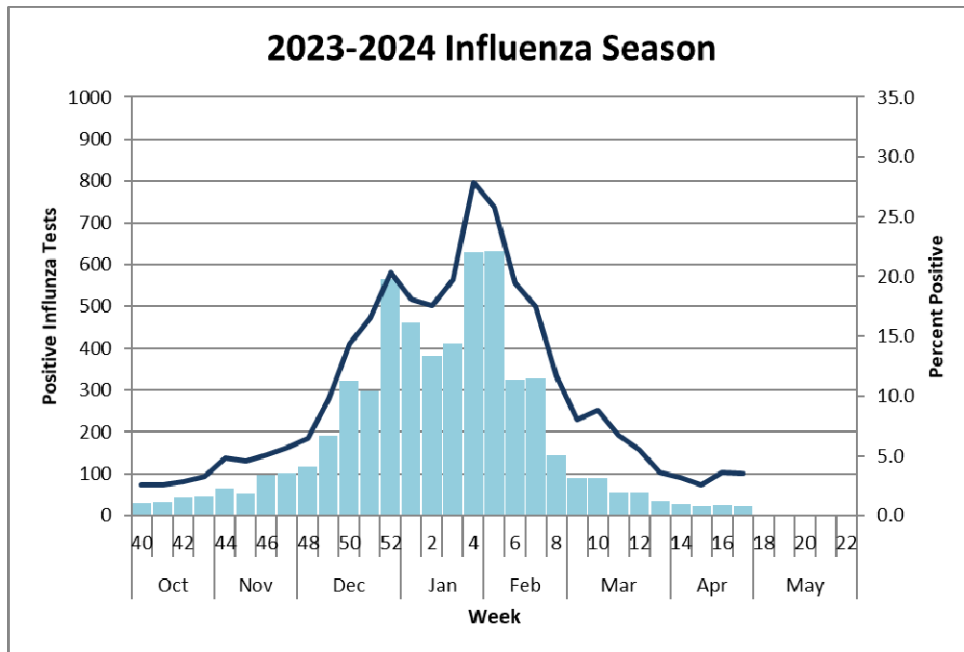

* Novel influenza A, outbreaks/unusual group expression of influenza and influenza-associated pediatric mortalities are reportable in the State of Texas. All other reporting is voluntary.

Please note: The COVID-19 pandemic is affecting healthcare seeking behavior which impacts data used for ILI surveillance.

Table I. Influenza Test Results

	Season to Date	Current Week
Total Individuals Tested	46380	688
Total Positive Tests	5702 (12.3%)	24 (3.5%)
Positive Rapid Type A	3476 (61.0%)	16 (66.7%)
Positive Rapid Type B	2226 (39.0%)	8 (33.3%)
Positive Rapid Type A and B	0 (0.0%)	0 (0.0%)
Positive Rapid Undifferentiated	0 (0.0%)	0 (0.0%)
Positive PCR/Culture Type A	0 (0.0%)	0 (0.0%)
Positive PCR/Culture Type B	0 (0.0%)	0 (0.0%)

Figure I. Number of Positive Influenza Cases for Collin County by MMWR Week

Independent School Districts Influenza Activity

Independent School Districts in Collin County that participated in influenza surveillance for Week 17 reported an absenteeism rate of 5.5% of which 2.0% was due to influenza-like illness.
