

COLLIN COUNTY OUTER LOOP

U.S. 75 to Rockwall County

Volume 1, No. 3 Fall 2005

Collin County Outer Loop Study Continues East of U.S. 75

Collin County ranks as one of the top growth areas in the State of Texas. Since the 2000 census, the County's population has grown by over 15 percent and by 270 percent since the 1980 census. The population growth along with private and commercial development requires future transportation planning. Collin County officials believe that now is the time to evaluate and prepare for the next major outer-loop thoroughfare.

The next major outer-loop thoroughfare is the proposed "Collin County Outer Loop." Collin County Commissioners have approved the preparation

of a study to determine a preferred corridor and route location for the Outer Loop between U.S. 75 and Rockwall County. HNTB Corporation of Plano was contracted to prepare the study.

The Collin County Outer Loop section between the Dallas North Tollway (DNT) extension and U.S. 75 in northern areas of Collin County has been under study during the past few years. This project will match into the Outer Loop Study west of U.S. 75, then continue east and south to the Rockwall County line.

Commissioners and County staff members believe that an alignment should be chosen soon due to significant population growth and development in the county. Land developers continue to construct new residential and commercial developments every month, narrowing the geometric envelope for the Collin County Outer Loop. In order

to avoid or minimize impacts to these developments, a right-of-way (ROW) corridor must be preserved quickly for the future multi-modal facility.

Initial public meetings occurred in 2003 on the Outer Loop section from the DNT extension to U.S. 75. Public input will once again be welcomed at a series of upcoming public meetings for the new study between U.S. 75 and Rockwall County.

"As we begin to consider preliminary routes and identify constraints, it is extremely important that we hear from residents," said Collin County Commissioner Joe Jaynes. "We need and welcome their feedback and will offer them that opportunity throughout the process."

Continued from page 1

The first Public Meeting was held on Thursday, February 24, 2005 at Melissa High School in Melissa, Texas.

Additional public meetings will be scheduled and announced in local newspapers, postcard mailings, and on the Collin County website, www.collincountytx.gov

The Collin County Outer Loop Study team has also been meeting and coordinating with city and county officials. The open communication will result in a comprehensive study that will assist Collin County Commissioners Court in making decisions about this future transportation facility.

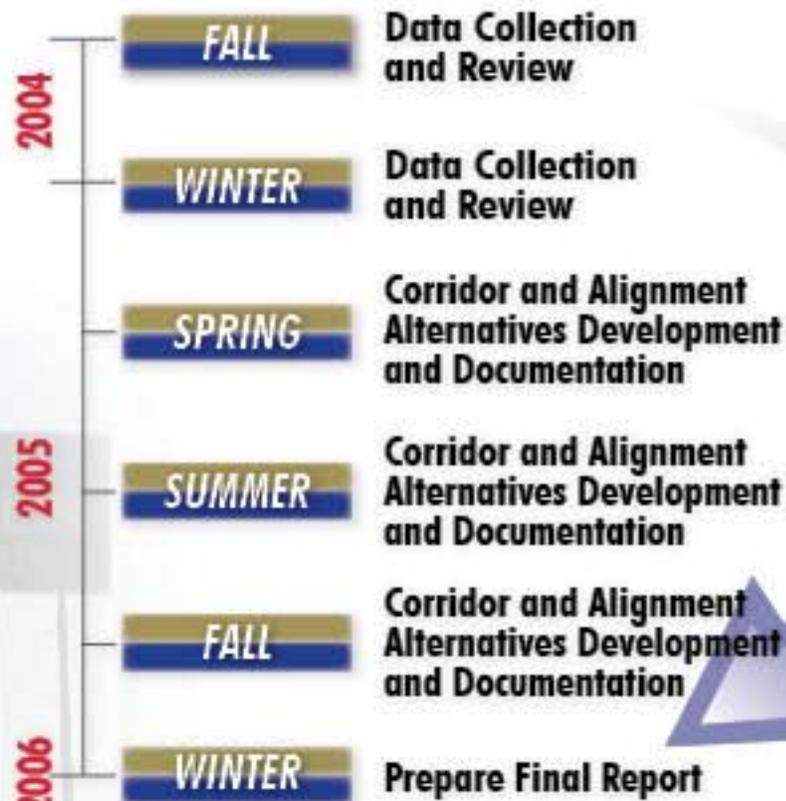

The Study Timeline

The Collin County Outer Loop Study was initiated in November 2004 and is anticipated to be complete in Spring 2006. The Study Timetable graphic illustrates the steps in the study process.

The initial data collection is complete. The constraints including lakes, rivers, cemeteries, existing/proposed roadways, and existing/proposed developments have been identified and documented. Alternative corridors, approximately 3,000 feet in width, which represent general areas for future study, have been identified, and a preliminary corridor evaluation has been developed. Alternatives alignments, approximately 500 feet in width, have been developed within the general vicinity of the preferred corridor(s). The alternative alignments represent the alternative locations for the proposed roadway. These alternative alignments will continue to be modified, based on comments from public meetings. These alignments will then be evaluated, and the most favorable alignment will be selected as the preferred alignment.

STUDY TIMETABLE

Your Input Is Important

Collin County citizens have an important role in defining the future transportation network within the county. While you may never have conducted a traffic study or drafted design plans, you can assist in developing a consensus plan of action to develop the future transportation system we all depend on in Collin County. Decisions made during the Study will affect Collin County's transportation system for several decades.

For more information on the Collin County Outer Loop Study Project or to contact the Study Team, you may:

Write to:
 Ruben Delgado, P.E.
 Collin County Director of Engineering
 825 N. McDonald Street, Suite 160
 McKinney, Texas 75069

Or
 Visit: www.collincountytx.gov

Or
ATTEND one of the upcoming public meetings and sign in to be added to the mailing list to receive project updates.

Planning Ahead: Your Collin County Commissioners

The Collin County Outer Loop Study was authorized by the Collin County Commissioners Court in October 2004. Your Collin County Commissioners are:

Ron Harris,
County Judge

Phyllis Cole,
County Commissioner, Precinct 1

Jerry Hoagland,
County Commissioner, Precinct 2

Joe Jaynes,
County Commissioner, Precinct 3

Jack Hatchell,
County Commissioner, Precinct 4

Planeando con anticipación: Sus comisionados del condado Collin

El estudio del circuito exterior del condado Collin fue autorizado por los comisionados del condado Collin en octubre del 2004. Sus comisionados del condado Collin son:

Ron Harris,
jefe del condado

Phyllis Cole,
comisionado del condado, distrito 1

Jerry Hoagland,
comisionado del condado, distrito 2

Joe Jaynes,
comisionado del condado, distrito 3

Jack Hatchell,
comisionado del condado, distrito 4
