TCEQ Annual Report Form..... 1

1.0 PURPOSE OF PROGRAM 23

2.0 STATUS OF PERMIT COVERAGE..... 24

3.0 ANNUAL REPORTING REQUIREMENTS 25

4.0 BMP IMPLEMENTATION STATUS..... 26

5.0 APPENDIX A – NOTICE OF CHANGE 61

Phase II (Small) MS4 Annual Report Form
TPDES General Permit Number TXR040000

A. General Information

Authorization Number: TXR040035

Reporting Year (year will be either 1, 2, 3, 4, or 5): 4

Annual Reporting Year Option Selected by MS4:

Calendar Year: X

Permit Year: _____

Fiscal Year: _____ Last day of fiscal year: (____)

Reporting period beginning date: (month/date/year) 1/1/2022

Reporting period end date: (month/date/year) 12/31/2022

MS4 Operator Level: 2 Name of MS4: Collin County MS4

Contact Name: Tracy Homfeld Telephone Number: 972-548-3733

Mailing Address: 4690 Community Avenue, Suite 200, McKinney, TX 75071

E-mail Address: thomfeld@co.collin.tx.us

A copy of the annual report was submitted to the TCEQ Region: YES X NO ____

Region the annual report was submitted to: TCEQ Region 4

B. Status of Compliance with the MS4 GP and SWMP

1. Provide information on the status of complying with permit conditions:
(TXR040000 Part IV.B.2)

	Yes	No	Explain
Permittee is currently in compliance with the SWMP as submitted to and approved by the TCEQ.	X		As of 3/16/2023, the SWMP is technically complete by TCEQ.
Permittee is currently in compliance with recordkeeping and reporting requirements.	X		

	Yes	No	Explain
Permittee meets the eligibility requirements of the permit (e.g., TMDL requirements, Edwards Aquifer limitations, compliance history, etc.).	X		
Permittee conducted an annual review of its SWMP in conjunction with preparation of the annual report	X		

2. Provide a general assessment of the appropriateness of the selected BMPs. You may use the table below to meet this requirement (see Example 1 in instructions):

MCM(s)	BMP	BMP is appropriate for reducing the discharge of pollutants in stormwater (Answer Yes or No and explain)
1	Promote Earth-Kind Landscaping	Yes
1	Storm Water Web Site	Yes
1	Storm Water Brochures	Yes
1	NCTCOG Committee Participation	Yes
1	Collin County Adventure Camp	Yes
1	Stream Clean Up Projects	Yes
2	Storm Drain System Outfall Mapping	Yes
2	Visual Monitoring of Outfalls	Yes
2	Illicit Discharge Investigations	Yes
2	Reduce Illegal Dumping	Yes
2	Promote Used Oil Recycling	Yes
2	Hazardous Material Spill Response	Yes
2	Reduce Failing Septic Systems	Yes
2	Illicit Discharge Training	Yes
2	Proper Pet Waste Disposal	Yes
3	Erosion Control Plan Review	Yes
3	Construction Inspection	Yes
3	Information Submitted by the Public	Yes
4	Long Term Operation and Maintenance of BMPs	Yes, but no permanent post-construction BMPs have been constructed in Collin County's regulated area that are not maintained by other entities.

MCM(s)	BMP	BMP is appropriate for reducing the discharge of pollutants in stormwater (Answer Yes or No and explain)
5	Storm Water Pollution Prevention Training/ Facility Specific SOP Manual	Yes
5	Storm Sewer System Cleaning/ ROW Mowing	Yes
5	Erosion Control during Road and Bridge Maintenance and Construction	Yes
5	Metal Recycling	Yes
5	Used Tires Recycling	Yes
5	Used Oil Recycling	Yes
5	Use of Licensed Applicators for Herbicides	Yes
5	Spill Prevention Training	Yes
5	Vehicle Maintenance	Yes
5	Vehicle Washing	Yes
5	Aggregate Stockpiles	Yes
5	Vehicle Fueling	Yes
5	County Facilities and Control Inventory	Yes
5	County Operation and Maintenance Activities	Yes
5	Contractor Oversight	Yes

3. Describe progress towards achieving the goal of reducing the discharge of pollutants to the MEP. If no progress was made or the BMP did not result in a reduction in pollutants, provide an explanation. Use the table below to meet this requirement (see Example 2 in instructions):

MCM	BMP	Information Used	Quantity	Units	Does the BMP Demonstrate a Direct Reduction in Pollutants? (Answer Yes or No and explain)
1	Promote Earth-Kind Landscaping	Myers Park and Event Center, Collin County Master Gardeners	1	Demonstration Garden	No. Although this BMP does not result in a direct reduction of pollutants, educating the citizens will increase awareness and decrease pollutants in stormwater.

MCM	BMP	Information Used	Quantity	Units	Does the BMP Demonstrate a Direct Reduction in Pollutants? (Answer Yes or No and explain)
1	Storm Water Web Site	Update web content to include annual report, Resources link on web page	1	Web page	No. Although this BMP does not result in a direct reduction of pollutants, educating the citizens will increase awareness and decrease pollutants in stormwater.
1	Storm Water Brochures	Brochures distributed with permit applications	7,215	Brochures	No. Although this BMP does not result in a direct reduction of pollutants, educating the citizens will increase awareness and decrease pollutants in stormwater.
1	NCTCOG Committee Participation	Attend meetings	4	Meetings	No. Although this BMP does not result in a direct reduction of pollutants, educating the citizens will increase awareness and decrease pollutants in stormwater.
1	Collin County Adventure Camp	Education Programs	11,889 students	Participants	No. Although this BMP does not result in a direct reduction of pollutants, educating the citizens will increase awareness and decrease pollutants in stormwater.
1	Stream Clean Up Projects	Debris removed	0	Pounds	Yes. Removal of trash and debris eliminates stormwater pollutants.
2	Storm Drain System Outfall Mapping	Outfall map	1	Map	No. Although this BMP does not result in a direct reduction of pollutants, mapping outfalls allows for the tracing of illicit discharges when observed.

MCM	BMP	Information Used	Quantity	Units	Does the BMP Demonstrate a Direct Reduction in Pollutants? (Answer Yes or No and explain)
2	Visual Monitoring of Outfalls	Outfall inspections	14	Outfalls	Yes. The visual monitoring of outfalls results in identification and removal of illicit discharges when observed.
2	Illicit Discharge Investigations	Public complaints and reporting	14	Investigations	Yes. The investigation and prosecution of illicit discharges reduces stormwater pollutants.
2	Reduce Illegal Dumping	Sheriff's reports	325	Investigations	Yes. The investigation and prosecution of illegal dumping reduces stormwater pollutants.
2	Promote Used Oil Recycling	Link to promote recycling locations	1	Web site link	No. Although this BMP does not result in a direct reduction of pollutants, educating the citizens will increase awareness and decrease pollutants in stormwater.
2	Hazardous Material Spill Response	Response calls	0	Responses events	Yes. Cleanup of spills reduces pollutants in stormwater.
2	Reduce Failing Septic Systems	Complaints and inspection requests	1,266 new system inspections and 34 complaint investigations	Investigations	Yes. The inspection of septic systems reduces the number of failing systems and stormwater pollutants.
2	Illicit Discharge Training	Number of County Employees receiving training	1	Trainees Departments	No. Although this BMP does not result in a direct reduction of pollutants, educating employees will increase awareness, reporting and investigation of illicit discharges and decrease pollutants in stormwater.

MCM	BMP	Information Used	Quantity	Units	Does the BMP Demonstrate a Direct Reduction in Pollutants? (Answer Yes or No and explain)
2	Proper Pet Waste Disposal	Not implemented yet	1	Meeting	No. It was determined by staff members at Myers Park that there is no pet waste found in the parks. The staff will continue to monitor the park and implement waste disposals where appropriate.
3	Erosion Control Plan Review	Plan review spreadsheet	55	Reviews	No, but the review of construction plans ensures compliance with CGP and reduces the potential of pollutants in stormwater.
3	Construction Inspection	Construction spreadsheet	100% of County roadway construction projects inspected, 16 active Residential Development Projects inspected.	Inspections	Yes. By inspecting construction sites, can evaluate if proper BMPs are in place to reduce sediment discharge and correct problems when observed.
3	Information Submitted by the Public	Development Services work orders	32	Complaints	Yes, reports by the public leads to investigations and reduces pollutants in stormwater.
4	Long Term Operation and Maintenance of BMPs	Public works records	0	BMPs	N/A. No BMPs identified.
5	Storm Water Pollution Prevention Training/ Facility Specific SOP Manual	Training sign-in sheets	1	Employees Trained	No. Although this BMP does not result in a direct reduction of pollutants, educating county workers will increase awareness and decrease pollutants in stormwater.
5	Storm Sewer System Cleaning/ ROW Mowing	Public Works records of ROW maintenance activities	21,303	Man-hours	Yes, maintenance of storm sewer system reduces pollutants in stormwater.

MCM	BMP	Information Used	Quantity	Units	Does the BMP Demonstrate a Direct Reduction in Pollutants? (Answer Yes or No and explain)
5	Erosion Control during Road and Bridge Maintenance and Construction	Public Works records of erosion control activities	457	Man-hours	Yes, erosion control BMPs reduces pollutants in stormwater.
5	Metal Recycling	Weight of metal recycled	69,640	Pounds	No. Recycling of materials reduces the amount of waste in landfills.
5	Used Tires Recycling	Number of tires recycled	1,095	Tires	No. Recycling of materials reduces the amount of waste in landfills.
5	Used Oil Recycling	Volume of used oil recycled	2,080	Gallons	No. Recycling of materials reduces the amount of waste in landfills.
5	Use of Licensed Applicators for Herbicides	Applicants records	2	Licenses	No. Use of licensed applicators promotes proper use and reduces the possibility of pollutants in stormwater.
5	Spill Prevention Training	Sign in sheets	20	Trainees	No. Although this BMP does not result in a direct reduction of pollutants, educating county workers will increase awareness and decrease pollutants in stormwater.
5	Vehicle Maintenance	Maintenance log	13	Inspections	No, but regular inspections of BMPs reduces the possibility of pollutants in stormwater.
5	Vehicle Washing	Maintenance log	12	Inspections	No, but regular inspections of BMPs reduces the possibility of pollutants in stormwater.

MCM	BMP	Information Used	Quantity	Units	Does the BMP Demonstrate a Direct Reduction in Pollutants? (Answer Yes or No and explain)
5	Aggregate Stockpiles	Inspection log	4	Inspections per site	Yes, regular inspections of BMPs allows for the timely correction of failed BMPs and reduces the possibility of pollutants in stormwater.
5	Vehicle Fueling	Leak detection reports	12	Reports per site	No, but regular inspections of fuel tanks reduce the possibility of pollutants in stormwater.
5	County Facilities and Control Inventory	Facilities Map	27	Facilities	No, but knowing the location of facilities within the regulated UA is required by the Phase 2 MS4 permit.
5	County Operation and Maintenance Activities	O&M Assessment	1	Annual assessment	No. New O&M activities, PP measures or structural controls were not identified in the 2022 assessment.
5	Contractor Oversight	Project records/contract documents	0	Contracts	No. Although this BMP does not result in a direct reduction of pollutants, requiring contractors to comply with County stormwater regulations will decrease the potential of pollutants in stormwater.

4. Provide the measurable goals for each of the MCMs, and an evaluation of the success of the implementation of the measurable goals (see Example 3 in instructions):

MCM(s)	Measurable Goal(s)	Explain progress toward goal or how goal was achieved. If goal was not accomplished, please explain.
Promote Earth-Kind Landscaping	1 demonstration garden	Met goal, the demonstration garden was maintained by Collin County and the local Master Gardeners.

MCM(s)	Measurable Goal(s)	Explain progress toward goal or how goal was achieved. If goal was not accomplished, please explain.
Storm Water Web Site	1 Screen shot of stormwater web pages	Met goal.
Storm Water Brochures	Distribute at least 400 copies of brochures with permit applications Download and begin distributing AgriLife Extension's Stormwater Management brochure on website	Exceeded goal, distributed 7,215 copies of brochures with new OSSF permit applications, development permit applications, pool construction permit applications, culvert permit applications and pet adoptions.
NCTCOG Committee Participation	3 sign-in sheets	Met goal, attended 4 committee meetings.
Collin County Adventure Camp	Educate at least 4000 students	Exceeded goal, educated 11,889 students.
Stream Clean Up Projects	At least 1 clean up event	Goal not accomplished. There were no stream clean-up events during 2022 due to staff shortage. The County will coordinate a stream clean-up to target specific sites for 2023.
Storm Drain System Outfall Mapping	1 Updated outfall map	Met goal, no new outfalls were identified in 2022. Maintained updated outfall map.
Visual Monitoring of Outfalls	1 Outfall monitoring map, Visual screening of at least 25% of outfalls	Exceeded goal, visually screened 100% of all outfalls (14 outfalls).
Illicit Discharge Investigations	Investigate 100% of illicit discharges reported	Met goal, 14 illicit discharges were observed and reported to the County via the hotline.
Reduce Illegal Dumping	1 Map of known dump sites Investigate 100% of illegal dumping complaints	Met goal, 325 reports of illegal dumping during reporting period. 1 updated map produced and 100% of illegal dumping complaints (325) were investigated.
Promote Used Oil Recycling	1 Web page screen shot	Met goal, 1 web page maintained.
Hazardous Material Spill Response	Respond to 100% of HAZMAT calls in County jurisdiction	Met goal, no calls were received regarding hazardous material spills within the County.
Reduce Failing Septic Systems	Inspect 100% of new septic systems Inspect 100% of septic complaints	Met goal, inspected 100% of new OSSFs (1,266). Inspected 100% of reports on malfunctioning systems (34).
Illicit Discharge Training	1 Training session	Goal not accomplished. No additional new employees were hired, therefore training session not necessitated.
Proper Pet Waste Disposal	1 meeting with Parks Dept.	Met goal. Held meeting with staff from Myers Park.
Erosion Control Plan Review	Maintain list of 100% of construction NOIs/CSNs submitted Review 100% of ESC plans	Met goal, maintained list of 100% of CSNs and NOIs submitted to County (55), reviewed 100% of erosion control plans submitted.
Construction Inspection	Inspect 100% of construction sites in jurisdiction	Met goal, inspected 100% of County roadway construction sites in jurisdiction. Also, all active (16) residential construction sites inspected by either the County or Design Engineer.

MCM(s)	Measurable Goal(s)	Explain progress toward goal or how goal was achieved. If goal was not accomplished, please explain.
Information Submitted by the Public	Investigate 100% of public complaints	Met goal, investigated 100% (32) drainage complaints received from the public.
Long Term Operation and Maintenance of BMPs	1 BMP map Inspect each BMP 2 times per year	Met goal, no BMPs were identified that were not maintained by other entities. Post construction BMPs such as detention ponds in residential subdivisions are being maintained by HOAs or the private land owner whose lot it resides on. There are also detention ponds on some commercial sites that are being maintained by the business owner. If the County receives a complaint regarding any of these ponds, they respond and require mitigation. No BMPs required inspection or maintenance.
Storm Water Pollution Prevention Training/ Facility Specific SOP Manual	1 training per year Attendee list Updated SOP Manual	Goal not accomplished. A stormwater inspector successfully completed stormwater permit compliance training on November 17 th , 2022. No annual training for designated employees was performed by the County. No updates to the SOP manual were necessary.
Storm Sewer System Cleaning / ROW Mowing	At least 10,000 man-hours of maintenance activities	Exceeded goal, 21,303 man-hours were expended on ROW maintenance activities.
Erosion Control during Road and Bridge Maintenance and Construction	Expend at least 500 man-hours per year on erosion control activities	Did not meet goal, 457 man-hours were expended on erosion control activities. The measurable goal will be redefined to track 100% of ROW maintenance and erosion control measures for 100% of CGP sites. Will submit an NOC to redefine measurable goal.
Metal Recycling	Recycle at least 80,000 pounds of metal per year	Did not meet goal, 69,640 pounds of metal were recycled. The amount of recycled material varies year to year. The measurable goal will be redefined to tarp and recycle 100% of accumulated recyclable metal annually. Will submit an NOC to redefine measurable goal.
Used Tires Recycling	Recycle at least 400 used tires per year	Exceeded goal, recycled 1,095 tires (937 passenger tires, 158 truck tires).
Used Oil Recycling	Recycle at least 1,000 gallons of waste oil per year	Exceeded goal, recycled 2,080 gallons of used oil.
Use of Licensed Applicators for Herbicides	At least 3 staff with applicator license	Did not meet goal, 2 staff members attended training to renew their Noncommercial Political Pesticide Applicator License. The County reassessed and will maintain 100% of applicator licenses by staff members who apply for and receive annual training to meet the County's overall stormwater goal and the MEP standard . Will submit an NOC to redefine measurable goal.
Spill Prevention Training	1 training per year Attendee list	Met goal. Conducted one training for 20 staff members.

MCM(s)	Measurable Goal(s)	Explain progress toward goal or how goal was achieved. If goal was not accomplished, please explain.
Vehicle Maintenance	At least 10 inspection reports per year Clean out, as needed, at least once per permit term	Exceeded goal, inspected monthly (13 times) during the reporting period. Cleanout was conducted once on 4/11/22.
Vehicle Washing	At least 10 inspection reports per year Clean out, as needed, at least once per permit term	Exceeded goal, inspected monthly (12 times) during the reporting period. Cleanout was conducted once on 4/11/22.
Aggregate Stockpiles	4 inspection reports per year for each stockpile site	Met goal, inspected 4 sites quarterly (4 times) during the reporting period.
Vehicle Fueling	12 leak detection reports per site per year	Met goal, performed 12 (monthly) leak detection reports at two sites with vehicle fueling tanks during the reporting period.
County Facilities and Control Inventory	1 Updated GIS map	Met goal, 1 updated map of County facilities.
County Operation and Maintenance Activities	1 assessment results	Met goal, performed 1 annual assessment of O&M activities.
Contractor Oversight	Enforce 100% of contracts	Met goal, no contracts were initiated in 2022 that necessitated contractors to comply with all of the stormwater pollution prevention measures.

C. Stormwater Data Summary

Provide a summary of all information used, including any lab results (if sampling was conducted) to assess the success of the SWMP at reducing the discharge of pollutants to the MEP. For example, did the MS4 conduct visual inspections, clean the inlets, look for illicit discharge, clean streets, look for flow during dry weather, etc.?

During 2022 permit year,

- 325 reports of illegal dumping were received by the County Sheriff.
- 14 outfalls were visually monitored. No illicit discharges were observed during visual outfall monitoring.
- 14 illicit discharge complaints were received on the hotline and investigated.
- 21,303 man-hours spent on storm system cleaning.
- 457 man-hours spent on erosion control activities.
- 69,640 pounds of metal recycled.
- 1,095 used tires recycled.
- 2,080 gallons of used motor oil recycled.
- 34 investigations of potentially failing OSSFs based on public complaints.

- 32 complaints of illegal construction activities were investigated by Development Services.
- Construction inspections were conducted on 100% of County roadway projects.
- Inspection of all active (16) residential development projects in jurisdiction by County (11) or Design Engineer (5).
- No hazardous material spill calls were made in 2022.

D. Impaired Waterbodies

1. Identify whether an impaired water within the permitted area was added to the latest EPA-approved 303(d) list or the Texas Integrated Report of Surface Water Quality for CWA Sections 305(b) and 303(d). List any newly-identified impaired waters below by including the name of the water body and the cause of impairment.

Within the past calendar year (2022), a new 303(d) list has been approved by EPA.

The 2022 Texas 303(d) List was approved for submission by the TCEQ on June 1, 2022. The Environmental Protection Agency approved the 2022 Texas 303(d) List on July 7, 2022. The following information was compiled from the 2022 EPA-approved 303(d) list and the Texas Integrated Report of Surface Water Quality. This information was included in the previous annual report for calendar year 2021 and is reproduced here for information purposes.

Segment #	Segment Name	Segment Description	Previous Listing on 303(d) List / Cause	New Listing in 2022 approved 303(d) List / Cause
0820	Lake Ray Hubbard	From Rockwall-Forney Dam in Kaufman County to Lavon Dam in Collin County, up to normal pool elevation of 435.5 feet (impounds East Fork Trinity River).	No	No
0820A	Cottonwood Creek	Perennial stream from the confluence with Rowlett Creek up to SH 5 (near Greenville Road).	No	No
0820B	Rowlett Creek	Perennial stream from the normal pool elevation of 435.5 feet of Lake Ray Hubbard to the Parker Road crossing.	Yes/ Bacteria in water	Yes
0820C	Muddy Creek	From the confluence with Lake Ray Hubbard, in Dallas County, to the headwaters east of Allen, in Collin County.	No	No
0821	Lake Lavon	From Lavon Dam in Collin County, up to normal pool elevation of 492 feet (impounds East Fork Trinity River).	No	No

Segment #	Segment Name	Segment Description	Previous Listing on 303(d) List / Cause	New Listing in 2022 approved 303(d) List / Cause
0821C	Wilson Creek	From the confluence with Lake Lavon in Collin County, up to West FM 455, just east of Celina, Collin Co., TX.	Yes/ Bacteria in water	Yes/ Bacteria in water
0821D	East Fork Trinity River above Lake Lavon	A portion of the East Fork Trinity River extending from the confluence with Lake Lavon (segment 0821) to the upper end of the water body in Collin County, Texas.	Yes/ Bacteria in water	Yes/ Bacteria in water
0823D	Doe Branch	From the confluence with Lake Lewisville/Elm Fork Trinity in Denton County to the headwaters northeast of Celina, Collin Co., TX.	No	No
0827A	White Rock Creek above White Rock Lake	Perennial stream from the headwaters of White Rock Lake upstream to the confluence with McKamy Branch east of the City of Addison.	Yes/ Bacteria in water	Yes/ Bacteria in water

2. If applicable, explain below any activities taken to address the discharge to impaired waterbodies, including any sampling results and a summary of the small MS4's BMPs used to address the pollutant of concern.

No sampling has been conducted by Collin County. The primary pollutant of concern for segments receiving stormwater from Collin County's urbanized area is bacteria.

Collin County has included several BMPs targeting the reduction of bacteria in their SWMP including:

- Pet Waste Brochures
- Stream Clean Up Projects
- Reduce Illegal Dumping
- Reduce Failing Septic Systems
- Visual Monitoring of Outfalls
- Illicit Discharge Investigations
- Proper Pet Waste Disposal

Description of bacteria-focused BMP	Comments/Discussion
Storm Water Brochures (Pet Waste)	The new pet waste brochure was posted to the County's web site and hard copies were distributed with each pet adopt. A total of 1,932 pet adoptions were conducted in 2022. The pet waste brochure educates the public on the water quality impacts that pet waste has on area waterbodies and the benefits of proper disposal.
Stream Clean Up Projects	There were no stream clean-up events during 2022. The County will coordinate a stream clean-up to target specific sites for 2023.
Reduce Illegal Dumping	325 reports of illegal dumping were by the County Sheriff and subsequently cleaned up by Collin County Public Works crews. Cleanup of trash and other debris prevents potential sources of bacteria from reaching waterways.
Reduce Failing Septic Systems	34 investigations of potentially failing OSSFs were conducted by the County based on public complaints. Failing septic systems are a potential source of bacteria. By investigating and correcting failing septic systems, the County prevents bacteria from reaching waterways.
Visual Monitoring of Outfalls and Illicit Discharge Investigations	The County conducted visual monitoring of 14 outfalls. Although not specifically targeting bacteria, the detection and removal of illicit discharges will reduce potential sources of bacteria that could be present.
Proper Pet Waste Disposal	The County will consider placing pet waste stations in parks, where appropriate. Investigation of potential locations will be accomplished by surveying Parks Department staff that maintain the parks. A meeting was conducted with staff from Myers Park to discuss potential contamination from pet waste.

- Describe the implementation of targeted controls if the small MS4 discharges to an impaired water body with an approved TMDL.

Not applicable. Part II.D.4(a) refers to impaired waterbodies with approved TMDLs. Collin County's regulated MS4 does not drain to an impaired waterbody with an approved TMDL. Collin County's regulated MS4 does not discharge directly to an impaired waterbody.

4. Report the benchmark identified by the MS4 and assessment activities:

Not applicable. Part II.D.4(a) refers to impaired waterbodies with approved TMDLs. Collin County's regulated MS4 does not drain to an impaired waterbody with an approved TMDL. Collin County's regulated MS4 does not discharge directly to an impaired waterbody.

5. Provide an analysis of how the selected BMPs will be effective in contributing to achieving the benchmark:

Not applicable. Part II.D.4(a) refers to impaired waterbodies with approved TMDLs. Collin County's regulated MS4 does not drain to an impaired waterbody with an approved TMDL. Collin County's regulated MS4 does not discharge directly to an impaired waterbody.

6. If applicable, report on focused BMPs to address impairment for bacteria:

Not applicable. Part II.D.4(a) refers to impaired waterbodies with approved TMDLs. Collin County's regulated MS4 does not drain to an impaired waterbody with an approved TMDL. Collin County's regulated MS4 does not discharge directly to an impaired waterbody.

7. Assess the progress to determine BMP's effectiveness in achieving the benchmark.

Not applicable. Part II.D.4(a) refers to impaired waterbodies with approved TMDLs. Collin County's regulated MS4 does not drain to an impaired waterbody with an approved TMDL. Collin County's regulated MS4 does not discharge directly to an impaired waterbody.

E. Stormwater Activities

Describe activities planned for the next reporting year:

MCM(s)	BMP	Stormwater Activity	Description /Comments
1	Promote Earth-Kind Landscaping	<ul style="list-style-type: none"> Continue to sponsor Earth-Kind Demonstration Gardens at Myers Park and Event Center Sponsor annual garden show 	<ul style="list-style-type: none"> 1 Demonstration Garden with rainwater harvesting and drip irrigation 1 Garden Show
1	Storm Water Web Site	<ul style="list-style-type: none"> Post annual report on website Maintain website links 	<ul style="list-style-type: none"> 1 Screen shot of stormwater web pages
1	Storm Water Brochures	<ul style="list-style-type: none"> Continue to distribute existing brochures with 100% of permit applications Download and begin distributing AgriLife Extension's septic tank maintenance brochure on website 	<ul style="list-style-type: none"> Distribute at least 400 copies of brochures with permit applications 1 septic tank brochure
1	NCTCOG Committee Participation	<ul style="list-style-type: none"> Attend at least 3 committee meetings of interest to County staff 	<ul style="list-style-type: none"> 3 sign-in sheets
1	Collin County Adventure Camp	<ul style="list-style-type: none"> Continue to offer educational activities related to environmental topics including stormwater pollution Track numbers of students and ISDs attending 	<ul style="list-style-type: none"> Educate at least 4000 students
1	Stream Clean Up Projects	<ul style="list-style-type: none"> Schedule and hold one cleanup event Track locations and amount of debris removed 	<ul style="list-style-type: none"> At least 1 clean up event
2	Storm Drain System Outfall Mapping	<ul style="list-style-type: none"> Update storm drain outfall map for areas of regulated UA 	<ul style="list-style-type: none"> 1 Updated outfall map
2	Visual Monitoring of Outfalls	<ul style="list-style-type: none"> Visual screening of identified outfalls in regulated UA Maintain tracking system/verify GIS map 	<ul style="list-style-type: none"> 1 Outfall monitoring map Visual screening for 100% of outfalls
2	Illicit Discharge Investigations	<ul style="list-style-type: none"> Investigate 100% of suspected illicit discharges reported Seek voluntary compliance or refer to adjacent MS4 or TCEQ 	<ul style="list-style-type: none"> Investigate 100% of illicit discharges reported
2	Reduce Illegal Dumping	<ul style="list-style-type: none"> Continue existing program to combat illegal dumping 	<ul style="list-style-type: none"> 1 Map of known dump sites Investigate 100% of illegal dumping complaints
2	Promote Used Oil Recycling	<ul style="list-style-type: none"> Promote used oil recycling through various businesses on web site 	<ul style="list-style-type: none"> 1 Web page screen shot
2	Hazardous Material Spill Response	<ul style="list-style-type: none"> Continue HAZMAT responsibilities in the County 	<ul style="list-style-type: none"> Respond to 100% of HAZMAT calls in County jurisdiction

MCM(s)	BMP	Stormwater Activity	Description /Comments
2	Reduce Failing Septic Systems	<ul style="list-style-type: none"> Continue OSSF inspection program 	<ul style="list-style-type: none"> Inspect 100% of new septic systems Inspect 100% of septic complaints
2	Illicit Discharge Training	<ul style="list-style-type: none"> Conduct 1 Illicit Discharge training 	<ul style="list-style-type: none"> 1 training session

F. SWMP Modifications

1. The SWMP and MCM implementation procedures are reviewed each year.

☒ Yes ☐ No

2. Changes have been made or are proposed to the SWMP since the NOI or the last annual report, including changes in response to TCEQ's review.

☒ Yes ☐ No

If "Yes," report on changes made to measurable goals and BMPs:

MCM(s)	Measurable Goal(s) or BMP(s)	Implemented or Proposed Changes (Submit NOC as needed)
5	GH-3 – Erosion Control During Road and Bridge Maintenance and Construction	The County is dependent on available staff to perform erosion control activities, which varies year to year. An NOC is being submitted to redefine the measurable goal. The County will track 100% of ROW maintenance and erosion control measures for 100% of CGP sites. The NOC is attached.
5	GH-4 – Metal Recycling	An NOC is being submitted to redefine the measurable goal. The County will tarp and recycle 100% of accumulated recyclable metal as the amount of recycled metal varies year to year. The NOC is attached.
5	GH-7 – Used of Licensed Applicators for Herbicides	The County reassessed the number of licensed applicators needed to meet the County's overall stormwater goal and the MEP standard . An NOC is being submitted to redefine the measurable goal. The County will maintain 100% of applicator licenses by staff members for apply for and receive annual training. The NOC is attached.

Note: If changes include additions or substitutions of BMPs, include a written analysis explaining why the original BMP is ineffective or not feasible, and why the replacement BMP is expected to achieve the goals of the original BMP.

3. Explain additional changes or proposed changes not previously mentioned (i.e. dates, contacts, procedures, annexation of land, etc.).

None.

G. Additional BMPs for TMDLs and I-Plans

Provide a description and schedule for implementation of additional BMPs that may be necessary, based on monitoring results, to ensure compliance with applicable TMDLs and implementation plans.

No additional BMPs are necessary for Collin County at this time. No TMDLs or I-Plans have been approved for waterbodies in Collin County's regulated MS4 area.

H. Additional Information

1. Is the permittee relying on another entity to satisfy any permit obligations?

☒ Yes ☐ No

If "Yes," provide the name(s) of other entities and an explanation of their responsibilities (add more spaces or pages if needed).

Name and Explanation:

Texas AgriLife Extension Agency through the Collin County Master Gardeners maintain the Earth-Kind Demonstration Gardens at Myers Park and Event Center. The County provides the land for the demonstration gardens. The cooperative agreement between the County and AgriLife was approved by the Collin County Commissioners on February 2, 2009.

- 2.a. Is the permittee part of a group sharing a SWMP with other entities?

☐ Yes ☒ No

- 2.b. If "yes," is this a system-wide annual report including information for all permittees?

☐ Yes ☐ No

If "Yes," list all associated authorization numbers, permittee names, and SWMP responsibilities of each member (add additional spaces or pages if needed):

Authorization Number: _____ Permittee: _____

I. Construction Activities

1. The number of construction activities that occurred in the jurisdictional area of the MS4 (Large and Small Site Notices submitted by construction site operators):

55

- 2a. Does the permittee utilize the optional seventh MCM related to construction?

 Yes X No

- 2b. If "yes," then provide the following information for this permit year:

The number of municipal construction activities authorized under this general permit	
The total number of acres disturbed for municipal construction projects	

Note: Though the seventh MCM is optional, implementation must be requested on the NOI or on a NOC and approved by the TCEQ.

J. Certification

If this is this a system-wide annual report including information for all permittees, each permittee shall sign and certify the annual report in accordance with 30 TAC §305.128 (relating to Signatories to Reports).

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Name (printed): Judge Chris Hill Title: County Judge

Signature: _____ Date: _____

Name of MS4: Collin County MS4

If you have questions on how to fill out this form or about the Stormwater Permitting program, please contact us at 512-239-4671.

Individuals are entitled to request and review their personal information that the agency gathers on its forms. They may also have any errors in their information corrected. To review such information, contact us at 512-239-3282.

1.0 PURPOSE OF PROGRAM

This Storm Water Management Program (SWMP) was developed for Collin County to reduce the discharge of pollutants in storm water runoff to the maximum extent practicable (MEP) in its Municipal Separate Storm Sewer System (MS4). This Program was developed with coordination between the County and the affected stakeholders to customize a program for Collin County that meets state and federal program requirements and also utilizes current activities, addresses issues that are important to the county, and is economically feasible.

2.0 STATUS OF PERMIT COVERAGE

Collin County submitted its original NOI and SWMP to the Texas Commission on Environmental Quality (TCEQ) on February 8, 2008 for coverage under the Texas Pollutant Discharge Elimination System (TPDES) General Permit for Storm Water Discharges from Small MS4s, General Permit No. TXR040000.

The original general permit expired August 12, 2012. A notice of intent to renew the general permit was published by TCEQ in the Texas Register on April 13, 2012, to allow administrative continuance of coverage to regulated Phase II MS4 entities under the 2007 MS4 general permit.

The Small MS4 General Permit, TPDES Permit No. TXR040000, was reissued on December 13, 2013. All regulated entities had 180 days to apply for coverage or a waiver under the general permit. The deadline to apply was June 11, 2014. Collin County submitted a Notice of Intent (NOI) and a revised Stormwater Management Program (SWMP) on June 11, 2014.

The most recently revised TPDES Small MS4 General Permit became effective on January 24, 2019 and the deadline for submission of the NOI and SWMP was July 23, 2019. An NOI and SWMP was submitted to TCEQ prior to the due date. The SWMP was declared administratively complete on September 4, 2019. Several requests for information/changes were received from TCEQ and responses were submitted by the County. The SWMP was declared technically complete on February 21, 2020. The SWMP is awaiting public notice. Approval of the SWMP is pending.

Upon notification from the TCEQ Office of Chief Clerk, the County will comply with public notice requirements by publishing notice in a newspaper of general circulation in Collin County. The Dallas Morning News is the newspaper of largest circulation. The notice will include the executive director's preliminary determination on the NOI and SWMP. The notice must also include the following information:

- The legal name of the MS4 operator;
- Identify whether the NOI is for a new authorization or a renewal of an existing authorization;
- The County's address;
- A brief summary of the information included in the NOI (general location and description of classified receiving waters that receive discharges from the small MS4);
- The location and mailing address for the public to provide comments to TCEQ;
- The public location where copies of the NOI and SWMP, as well as the executive director's general permit and fact sheet, may be reviewed; and
- If required by the executive director, the date, time, and location of the public meeting.

The public comment period begins on the first date that the notice is published and lasts for at least 30 days. If TCEQ determines that there is a significant public interest, the County will be instructed to publish a notice of public meeting and hold a public meeting in Collin County. The notice of public meeting must be published at least 30 days prior to the meeting. If a public meeting is held, then the public comment period ends at the closing of the public meeting. The County is required to file an affidavit of publication within 60 days of receiving written instructions from the Chief Clerk. Although the TCEQ will facilitate the public meeting, the County will be required to present to the public the contents of the NOI and SWMP and provide maps, data, and a sign-in sheet for the public meeting.

3.0 ANNUAL REPORTING REQUIREMENTS

A concise annual report must be submitted by Collin County to the Executive Director of TCEQ within 90 days of the end of each reporting year during the permit term. The annual report must be prepared and submitted regardless of whether the County's SWMP and NOI have been approved by TCEQ. The permit term began when the TPDES Small MS4 General Permit was reissued (January 24, 2019). The reporting years and deadlines for annual reports are specified below.

The County has chosen calendar year as their reporting year for their MS4 permit. Annual reports are due 90 days following the end of their reporting year. Therefore, annual reports are due to TCEQ on March 31st of each year from 2020 through 2024.

Year	Reporting Cycle	Annual Report Due Date
1	01/24/2019 – 12/31/2019	03/31/2020
2	01/01/2020 – 12/31/2020	03/31/2021
3	01/01/2021 – 12/31/2021	03/31/2022
4	01/01/2022 – 12/31/2022	03/31/2023
5	01/01/2023 – 12/31/2023	03/31/2024

A copy of the annual report must be readily available for review by authorized TCEQ personnel upon request. The report must contain a number of elements including:

- The status of the compliance with permit conditions, an assessment of the appropriateness of the identified BMPs, progress towards achieving the statutory goal of reducing the discharge of pollutants to the MEP, the measurable goals for each of the MCMs, and an evaluation of the success of the implementation of the measurable goals;
- A summary of the results of information collected and analyzed, during the reporting period, including monitoring data used to assess the success of the program at reducing the discharge of pollutants to the MEP;
- If applicable, a summary of any activities taken to address the discharge to impaired waterbodies, including any sampling results and a summary of the small MS4s BMPs used to address the pollutant of concern;
- A summary of the stormwater activities the MS4 operator plans to undertake during the next reporting year;
- Proposed changes to the SWMP, including changes to any BMPs or any identified measurable goals that apply to the program elements;
- Description and schedule for implementation of additional BMP's that may be necessary, based on monitoring results, to ensure compliance with applicable TMDLs and implementation plans. For waters that are listed as impaired after discharge authorization pursuant to Part II.D.4, include a list of such waters and the pollutant(s) causing the impairment, and a summary of any actions taken to comply with the requirements of Part II.D.4.b.;
- Notice that the MS4 operator is relying on another government entity to satisfy some of its permit obligations (if applicable);
- (h) The number of construction activities where the small MS4 is the operator and authorized under the 7th optional MCM, including the total number of acres disturbed; and
- The number of construction activities that occurred within the jurisdictional area of the small MS4 (as noticed to the permittee by the construction operator), and that were not authorized under the 7th MCM.

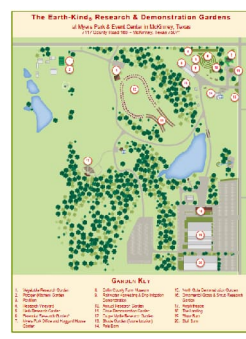

4.0 BMP IMPLEMENTATION STATUS

A Storm Water Management Program (SWMP) was developed for Collin County for coverage under the Texas Pollutant Discharge Elimination System (TPDES) General Permit for Storm Water Discharges from Small MS4s. The current permit duration is from 01/24/2019 to 12/31/2023.

The purpose of the SWMP developed for Collin County is to reduce the discharge of pollutants in storm water runoff to the maximum extent practicable (MEP) in its Municipal Separate Storm Sewer System (MS4). This program was developed with coordination between the County and the affected stakeholders to customize a program for Collin County that meets state and federal program requirements and also utilizes current activities, addresses issues that are important to the County, and is economically feasible. As documented in this annual report, Collin County has implemented its SWMP effectively during the reporting period. This annual report covers activities for the 2022 calendar year from January 1, 2022, through December 31, 2022.

The annual report is organized by Minimum Control Measures with one-page summaries of the 2022 activities. Documentation that the County has achieved the measurable goals is provided on the enclosed thumb drive.

A Notice of Change (NOC) is warranted for three of the BMPs and is included in Appendix A.

	REPORTING PERIOD: JANUARY 1, 2022 – DECEMBER 31, 2022		YEAR 2022
	PROMOTE EARTH-KIND LANDSCAPING		PE/PI-1
Responsible Authority *Engineering AgriLife	BMP DESCRIPTION <p>On the February 2, 2009 Collin County Commissioners Court approved a cooperative agreement with AgriLife Extension to conduct research and demonstration projects at Collin County's Myers Park and Event Center. The projects focus on Environmental Stewardship and Natural Resources Conservation within the landscape.</p> <p>The project evaluates plant material for the landscape to determine which plants to recommend to homeowners and landscape professionals. The research identifies plants that do not require pesticides or chemical fertilizers and require little to no supplemental irrigation. The Earth-Kind Environmental Stewardship Program's objective is to combine the best of organic and traditional gardening and landscaping principles to create a horticultural system based on real world effectiveness and environmental responsibility.</p> <p>The Earth-Kind Demonstration Project is provided through a partnership between the Texas AgriLife Extension Service and Collin County's Myers Park and Event Center. A portion of the project focuses on demonstrating innovative ways to reduce the effects of storm water from parking areas. The Storm Water Management Demonstration Project consists of a Rain Garden and porous pavement on the edge of the large parking area at Myers Park. The rain garden and porous pavement are proven technologies for managing storm water runoff, reducing contaminants from entering our water ways, and preventing erosion.</p> <p>Section of Population Addressed: Residents, Visitors</p>

	STORM WATER WEB SITE		PE/PI-2
Responsible Authority * Information Technology Public Information Engineering	BMP DESCRIPTION Collin County's website is nationally recognized and was named among the top county government portals in 2007. The County has developed a web page for their existing web site that specifically addresses storm water related issues. The Storm Water Web Site promotes and advertises upcoming Public Involvement events such as the Collin County Adventure Camp (PE/PI-5), Stormwater Forum Meetings (PE/PI-6), and Stream Clean-up Projects (PE/PI-7) through an on-line Community Events Calendar. The web site also publicizes illicit discharge BMPs such as Used Oil Recycling (ID-6) and Recycling Centers (ID-7). The web site has also provided NCTCOG wet weather monitoring results, illegal dumping information, subdivision regulations, and links to both the EPA and TCEQ storm water websites for additional information on NPDES/TPDES regulations.

	STORM WATER BROCHURES		PE/PI-3
Responsible Authority * Engineering	BMP DESCRIPTION <p>These are multi-page printed materials used to convey detailed information on specific topics related to storm water management. The brochure, "The Dirty Dozen," has been added to all permit packets distributed by Collin County Development Services. Brochures that educate contractors and builders on construction SWPPPs and inform them of TCEQ construction storm water requirements are distributed as part of the all commercial building packets. The County will continue to distribute existing brochures. In Year 2, the County will develop a new brochure on the proper disposal of pet waste. Hardcopies of the brochures will be distributed by the Collin County Animal Shelter with adoption papers in order to encourage proper disposal of pet wastes. During Year 3, the County will utilize the AgriLife educational pamphlet on Stormwater Management and distribute it in digital format on their website. During Year 4, the County will distribute AgriLife brochures on proper septic tank maintenance with OSSF permits and in PDF format on the County's Storm Water Web Page (PE/PI-2). Every applicant seeking an OSSF permit, a development permit, a pool permit, or a Commercial Fire Code permit from Collin County receives digital or paper copies of the brochures.</p>

	COLLIN COUNTY ADVENTURE CAMP	PE/PI-5
Responsible Authority * Engineering Collin County Adventure Camp	BMP DESCRIPTION In 1995, representatives of the Collin County Commissioner's Court, the YMCA, the Heard Museum, and school districts initiated a plan to construct, and operate a camp to provide life enhancing outdoor educational and recreational experiences for Collin County children and families. County bond funds were used to acquire land and construct camp facilities. The Camp is operated by the Metropolitan Dallas YMCA. The Camp opened in 2006 and its first Open House "Community Day" was attended by 500 community residents. By the Fall of 2006, over 7,000 students had attended Collin County YMCA Adventure Camp for outdoor education, and over 3,000 family and community guests attended for conferences and retreats. The Camp offers several lesson plans that are well suited for storm water education including "Taming the Land" and "Learning the Lake". In the Water Quality Lab students assess the quality of the lake water through biological sampling (using pond nets to find aquatic life), physical tests (using a Secchi disc and thermometer), and chemical tests (for dissolved oxygen and carbon dioxide).

	REPORTING PERIOD: JANUARY 1, 2022 – DECEMBER 31, 2022		YEAR 2022
	STORM DRAIN SYSTEM OUTFALL MAPPING		ID-1
BMP DESCRIPTION To facilitate their illicit discharge detection and elimination program, Collin County has developed a storm drain system outfall map, which identifies the location of all outfalls and the names and locations of the waters of the U.S. to which they drain. The County will update outfall/storm system maps based on the 2010 census during the next permit cycle. The GIS mapping analysis will be performed to identify outfalls from roadside ditches along roads where they enter Waters of the U.S. This analysis will focus on the County's regulated UA and will intersect the county road GIS shapefile with the stream shapefile to identify outfalls. There will generally be 4 outfalls at each bridge and/or culverts under county roads where the waterbody is classified as a Waters of the U.S. If the regulated UA is only located on one side of the county road, there will only be 2 regulated outfalls. Supplemental information on outfall locations is derived from visual inspections along streambanks. Precise locations of outfalls are determined through the inspection of aerial photographs and field verification.			
ACTIVITIES PLANNED FOR NEXT REPORTING PERIOD <ul style="list-style-type: none"> Maintain outfall map and updated as needed based on visual screening of outfalls (ID-2) 			
PROPOSED CHANGE <ul style="list-style-type: none"> None 			
PROGRESS DURING CURRENT REPORTING PERIOD Within unincorporated Collin County, the storm drain system consists exclusively of roadside ditches. The current GIS database characterizes the storm drain system that Collin County is responsible for maintaining. This GIS database is updated regularly based on new roads and culverts installed in unincorporated Collin County. An outfall map for the UA was developed in 2021. The map identifies 14 outfalls in Collin County urbanized area. No new outfalls were identified in 2022. The current updated UA outfall map is attached.			
Implementation Activity		Measurable Goal	Completion Date

	VISUAL MONITORING OF OUTFALLS		ID-2
Responsible Authority * Public Works	BMP DESCRIPTION Collin County staff performs visual monitoring in the Urbanized Areas during dry weather periods to make visual inspections for the presence of certain pollutants. If the County finds that the contamination is coming from an adjacent MS4, the County will refer the inspection results to the storm water coordinator for that municipality. The County GIS staff performed a mapping analysis to identify outfalls in Collin County's UA areas during the first permit term. The outfall map will be updated for new outfalls in the regulated UA based on the 2010 Census. The County will visually inspect all identified outfalls once per permit term.

	REPORTING PERIOD: JANUARY 1, 2022 – DECEMBER 31, 2022		YEAR 2022
	ILLICIT DISCHARGE INVESTIGATIONS		ID-3
Responsible Authority * Public Works	BMP DESCRIPTION The County lacks the legal authority to prohibit illicit discharges and illegal connections in the unincorporated UA. The County uses Visual Monitoring of Outfalls (ID-2) to detect illicit discharges. As the County does not have “right-of-entry” typically granted by ordinances, the County seeks the voluntary cooperation of suspected dischargers. The County will visually track illicit discharges to attempt to identify the source. If illicit connections or discharges are observed from another operator’s MS4, the County will notify that MS4 within 48 hours of discovery. If notification of the MS4 is not practicable, the County will notify the TCEQ regional office.		
Appropriateness of BMP <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No If No: <input type="checkbox"/> Changes Proposed <input type="checkbox"/> NOC Submitted Date _____	ACTIVITIES PLANNED FOR NEXT REPORTING PERIOD <ul style="list-style-type: none"> Investigate 100% of suspected illicit discharges reported Seek voluntary compliance or refer to adjacent MS4 or TCEQ

	PROPER PET WASTE DISPOSAL		ID-9
BMP DESCRIPTION <p>The County operates and maintains several parks for use by residents and visitors to Collin County. These include Myers Park and Event Center, Parkhill Prairie, Sister Grove Park, Trinity Trail and Bratonia Park. During the next permit term, the County will assess the use of individual parks by pet owners and determine the potential for bacterial contamination from pet waste at the parks. The assessment will be completed based on surveys of maintenance staff at individual parks and will consider slope, soils, vegetation type, proximity to waterbodies and buffer zones. If the assessment determines that specific locations have the potential to be significant sources of bacteria, the County will install and maintain pet waste stations at the locations.</p>

	EROSION CONTROL PLAN REVIEW		C-1
BMP DESCRIPTION <p>The urbanized area in the unincorporated areas of Collin County is contained within the ETJs of the cities and the County has interlocal agreements with each of these cities (see Appendix 1) to regulate subdivisions in their ETJ, in accordance with House Bill 1445 and Chapter 242 of the Local Government Code. Within each City's ETJ, construction plans must conform to that City's requirements. Construction plans including erosion and sediment control plans are submitted and reviewed by the Cities. For subdivisions that disturb 1 acre or more of land in unincorporated Collin County, the CGP requires the development of a SWPPP and submittal of the construction site (CSN) or Notice of Intent (NOI) to the MS4 operator (County). For each CSN or NOI submitted, the County will determine if the construction site is located in the ETJ of a city and share the information with the respective city. The County will also determine if the site is located in the County's regulated UA.</p> <p>For the unincorporated areas that are outside of the ETJs, the County's authority is limited to commercial or residential building permits, which includes submittal of ESC plans for disturbances greater than 1 acre. The County's subdivision regulations were updated during the previous permit term through signed Court Order (No. 2012-828-11-05) which was adopted on November 5, 2012.</p>			
Responsible Authority * Engineering Development Services		ACTIVITIES PLANNED FOR NEXT REPORTING PERIOD <ul style="list-style-type: none"> • Verify and track 100% of NOIs/CSNs submitted to the County • Review 100% of ESC plans outside of ETJ for commercial or residential building permits and enforce subdivision regulations

	REPORTING PERIOD: JANUARY 1, 2022 – DECEMBER 31, 2022		YEAR 2022
	STORM WATER POLLUTION PREVENTION TRAINING / FACILITY SPECIFIC SOP MANUAL		GH-1
Responsible Authority * Engineering	BMP DESCRIPTION The County conducts stormwater pollution prevention training annually to educate staff on proper storm water pollution prevention techniques. The training course may be held in-house or by computer-based training modules that are reviewed by staff. The following departments receive pollution prevention training: Engineering, Development Services, Equipment Services, Facilities Maintenance, Road and Bridge, and Fire Marshal. The employee training should include the following if applicable: park and open space maintenance; street, road, or highway maintenance; fleet and building maintenance; stormwater system maintenance; new construction and land disturbances; municipal parking lots; vehicle and equipment maintenance and storage yards; waste transfer stations; and salt/sand storage locations. A facility specific SOP manual was developed during the first permit term for use during annual pollution prevention training. This manual will be reviewed annually and undated as needed. Each trainee will be required to sign an attendance sheet acknowledging that they received the training.

	REPORTING PERIOD: JANUARY 1, 2022 – DECEMBER 31, 2022	YEAR 2022
	RIGHT-OF-WAY (ROW) MAINTENANCE	GH-2
Responsible Authority * Public Works/ Road and Bridge Maintenance	BMP DESCRIPTION <p>The storm drain system in unincorporated Collin County consists of roadside ditches that are maintained by the County Public Works, Road and Bridge Department as part of the ROW maintenance program. The purpose of this management practice is to reduce the amount of debris, trash and other pollutants in the storm drain system through maintaining and cleaning of roadside ditches and ROWs on a regular basis.</p> <p>The Road and Bridge Division currently maintains roadside ditches and ROW through a periodic inspection and preventative maintenance program. The County utilizes log books and a work order system to document the preventative maintenance of the ROW.</p> <p>Material removed from the ROW is used as fill if possible and stabilized with erosion control mats and vegetated with a seed mixture. If contamination is suspected, the material is tested and taken to an approved site for disposal. The County currently uses the North Texas Municipal Water District landfill in Melissa for disposal of floatables.</p>	
APPROPRIATENESS OF BMP <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No If No: <input type="checkbox"/> Changes Proposed <input type="checkbox"/> NOC Submitted Date _____	ACTIVITIES PLANNED FOR NEXT REPORTING PERIOD <ul style="list-style-type: none"> • Continue inspection, cleaning and maintenance • Update maintenance/cleaning log 	
Measurable Goal Successfully Implemented? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	PROPOSED CHANGE <ul style="list-style-type: none"> • None 	
PROGRESS DURING CURRENT REPORTING PERIOD <p>The County continued its on-going program of inspection, cleaning and maintenance of the ROW. The Public Works Road and Bridge Department maintains a log of all activities conducted. Monthly Reports for January to December 2022 have been generated for all maintenance activities, defined by County Road number and activity type. A total of 21,303 man-hours were spent on ROW maintenance activities during the reporting year. The breakdown of individual activities is listed below.</p> <ul style="list-style-type: none"> Clean/Repair Culverts – 653 hrs. Clearing-Grubbing – 508 hrs. Drainage Ditch Regrading – 815 hrs. Dumpsite Cleanup - Roadside Litter Control – 1103 hrs. Inspect Bridges – 511 hrs. Inspect/Size Culverts – 108 hrs. Install Culverts/Bands – 103 hrs. Maintenance Grading – 454 hrs. Mow-ROW – 213 hrs. Tree-Brush cutting – 429 hrs. Weed eating – 216 hrs.

	EROSION CONTROL DURING ROAD AND BRIDGE MAINTENANCE AND CONSTRUCTION	GH-3
Responsible Authority <ul style="list-style-type: none"> • *Public Works / Bridge Maintenance 	BMP DESCRIPTION <p>The goal of this BMP is to reduce pollutant loads which may result from the routine maintenance or repairs to roadways and bridges or construction of new county roads. Routine maintenance of roads and bridges and maintenance of erosion and sediment control BMPs can alleviate the impacts of various pollutants including heavy metals, hydrocarbons and sediment that are typically deposited on streets and bridges.</p> <p>The County uses Curlex erosion control mats and socks that are filled with aspen shavings at all construction sites and complies with the TPDES Construction General Permit (CGP). After maintenance activities are completed, the areas are seeded with a seed mixture consisting of Rye, Bermuda, Foxtail, or Fescue depending on the season for stabilization. Construction site notices and NOIs will be tracked through BMP C-1.</p> <p>Material removed during roadway upgrades, bridge maintenance, and drainage ditch maintenance is used as fill if possible and stabilized with erosion control mats and vegetated with a seed mixture. If contamination is suspected, the material is tested and taken to an approved site for disposal. The County currently uses the North Texas Municipal Water District landfill in Melissa for disposal of floatables.</p>

	VEHICLE MAINTENANCE		GH-9
Responsible Authority *Public Works / Equipment Services APPROPRIATENESS OF BMP <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No If No: <input type="checkbox"/> Changes Proposed <input type="checkbox"/> NOC Submitted Date: Measurable Goal Successfully Implemented? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	BMP DESCRIPTION This BMP involves the development of a program that focuses on controlling pollutants and reducing storm water impacts from the County's automobile maintenance shop. Vehicle maintenance facilities typically contain significant quantities of fuels, solvents and motor oils and often generate large amounts of waste. Preventative measures such as good housekeeping, spill control, parts cleaning and recycling of automotive fluids including antifreeze, waste oil, transmission and hydraulic fluid are necessary to minimize the impacts of this generated waste. The Collin County Public Works Service Center performs maintenance on County vehicles. A central floor drain within the fleet maintenance shop drains through an oil/sand separator before being discharged to the sanitary sewer. The soil/sand separator must be maintained on a regular basis to function properly. The County will continue to maintain the oil/sand separator and document these maintenance activities as part of their SWMP.		
	ACTIVITIES PLANNED FOR NEXT REPORTING PERIOD <ul style="list-style-type: none"> • Inspect oil/sand separator at least 10 times per year • Clean oil/sand separator as-needed but at least once per permit term 		
	PROPOSED CHANGE <ul style="list-style-type: none"> • None 		
	PROGRESS DURING CURRENT REPORTING PERIOD The oil/sand separator located at the maintenance shop was inspected monthly during 2022. The oil/sand separator was visually inspected on 13 dates as shown on the attached maintenance log. Maintenance needs were assessed monthly following inspections. Based on the visual inspections, cleanout was conducted on 4/11/22.		
Implementation Activity	Measurable Goal	Completion Date	
<ul style="list-style-type: none"> • Inspect oil/sand separator at least 10 times per year • Clean oil/sand separator as-needed but at least once per permit term 	<ul style="list-style-type: none"> • At least 10 inspection reports per year • 1 clean out per permit term 	12/31/22

	VEHICLE FUELING		GH-12
BMP DESCRIPTION <p>This best management practice involves the education of County employees on the potential water quality impacts that can result from discharges associated with fueling stations and the development of procedures to minimize or prevent discharges. The County dispenses fuel at two locations, the Public Works Service Center and the Farmersville Facility. The County maintains spill prevention control and countermeasure (SPCC) plans for both facilities. The County also maintains absorbent material at all fuel islands for small spills and spill kits for larger spills. The County utilizes a canopy over the fuel island at the Public Works Service Center to prevent contact of rainwater with the fueling station. This site utilizes 2 underground storage tanks, one stores 6,000 gallons of automobile fuel and the other stores 12,000 gallons of diesel. The County's Farmersville Facility dispenses gasoline and diesel fuel from a two-chambered vaulted above ground storage tank that stores 10,000 gallons. The Farmersville fueling area is also covered. The County also has an underground storage tank at the Justice Center which provide fuel for generators.</p>

5.0 APPENDIX A – NOTICE OF CHANGE

OFFICE OF THE COUNTY JUDGE

June 14, 2023

Texas Commission on Environmental Quality
Storm Water and Pretreatment Team (MC-148)
P.O. Box 13087
Austin, Texas 78711-3087

Re: Phase II MS4 Annual Report Transmittal for Collin County MS4
TPDES Permit Number: TXR040035

Dear Team Leader:

This correspondence is to serve notice regarding changes to the Collin County MS4 (TXR040035) Storm Water Management Program (SWMP). As TCEQ has not completed the public notice phase and approval the County's NOI and SWMP, a Notice of Change form is required. Prior to TCEQ approval, changes may be requested through a letter submitted to TCEQ. The County hereby requests changes to the SWMP to update implementation activities for three BMPs. Additional details of the proposed changes are provided in the Annual Report and on the revised SWMP BMP pages (attached).

Pollution Prevention & Good House-keeping Control Measure

- GH-3 Erosion Control During Road and Bridge Maintenance and Construction

Justification: Implementation of this BMP is contingent on maintaining work order system and erosion & sediment control BMP during activities as required by the TPDES CGP. The County is dependent on available staff to perform erosion control activities. An NOC is being submitted to redefine the measurable goal. The new measurable goal is to track 100% of ROW maintenance and erosion control measures for 100% of CGP sites. A revised BMP page for the County's SWMP is attached.

- GH-4 Metal Recycling

Justification: Implementation of this BMP is contingent on conducting recycling and storing metals in a designated area. An NOC is being submitted to redefine the measurable goal as the tonnage of recyclable metal varies year to year. The new measurable goal is to tarp and recycle 100% of accumulated recyclable metal annually. A revised BMP page for the County's SWMP is attached.

- GH-7 Used of Licensed Applicators for Herbicides

Justification: Implementation of this BMP is contingent on conducting annual training for maintenance of their Noncommercial Political Pesticide Applicator License. An NOC is being submitted to redefine the measurable goal. The new measurable goal is to maintain 100% of applicator licenses by staff who apply for and receive annual training to meet the County's overall stormwater goal and the MEP standard. A revised BMP page for the County's SWMP is attached.

Sincerely,

A handwritten signature in blue ink, appearing to read "Chris Hill", with a large, sweeping flourish extending to the right.

Chris Hill

	EROSION CONTROL DURING ROAD AND BRIDGE MAINTENANCE AND CONSTRUCTION		GH-3
RESPONSIBLE AUTHORITY * Public Works/ Bridge Maintenance	DESCRIPTION The goal of this BMP is to reduce pollutant loads which may result from the routine maintenance or repairs to roadways and bridges or construction of new county roads. Routine maintenance of roads and bridges and maintenance of erosion and sediment control BMPs can alleviate the impacts of various pollutants including heavy metals, hydrocarbons and sediment that are typically deposited on streets and bridges. The County uses Curlex erosion control mats and socks that are filled with aspen shavings at all construction sites and complies with the TPDES Construction General Permit (CGP). After maintenance activities are completed, the areas are seeded with a seed mixture consisting of Rye, Bermuda, Foxtail, or Fescue depending on the season for stabilization. Construction site notices and NOIs will be tracked through BMP C-1. Material removed during roadway upgrades, bridge maintenance, and drainage ditch maintenance is used as fill if possible and stabilized with erosion control mats and vegetated with a seed mixture. If contamination is suspected, the material is tested and taken to an approved site for disposal. The County currently uses the North Texas Municipal Water District landfill in Melissa for disposal of floatables.		
APPLICABILITY <div> <div>Residents</div> <div>Visitors</div> <div>X Public Service Employees</div> <div>Businesses</div> <div>Commercial/Industrial</div> <div>Construction</div> </div>	RATIONALE FOR SELECTION <ul style="list-style-type: none"> Roadway and bridge maintenance pollution prevention practices can reduce pollutant loadings from existing road surfaces as part of a larger operation and maintenance program. 		
YEAR	IMPLEMENTATION ACTIVITY		MEASURABLE GOAL
01/24/19 - 12/31/19	<ul style="list-style-type: none"> Maintain work order system and erosion & sediment control BMPs during activities as required by the TPDES CGP 		Expend at least 500 man-hours per year on erosion control activities
01/01/20 - 12/31/20	<ul style="list-style-type: none"> Maintain work order system and erosion & sediment control BMPs during activities as required by the TPDES CGP 		Expend at least 500 man-hours per year on erosion control activities
01/01/21- 12/31/21	<ul style="list-style-type: none"> Maintain work order system and erosion & sediment control BMPs during activities as required by the TPDES CGP 		Expend at least 500 man-hours per year on erosion control activities
01/01/22 - 12/31/22	<ul style="list-style-type: none"> Maintain work order system and erosion & sediment control BMPs during activities as required by the TPDES CGP 		Expend at least 500 man-hours per year on erosion control activities
01/01/23 - 12/13/23	<ul style="list-style-type: none"> Maintain work order system and erosion & sediment control BMPs during activities as required by the TPDES CGP 		Track 100% of ROW maintenance and erosion control measures for 100% of CGP sites.

	METAL RECYCLING		GH-4
RESPONSIBLE AUTHORITY * Public Works	DESCRIPTION This BMP involves the proper storage of metals at County facilities to prevent or reduce the discharge of pollutants to storm water. This BMP involves storing metals in a designated area, under cover to reduce exposure to storm water, inspecting the storage areas frequently and training employees. Used metal is recycled through a contact with Garland Steel. The metal is picked up on a monthly basis to minimize storage times. Any metal that requires temporary outdoor storage is covered with a tarp to prevent contact with storm water.		
APPLICABILITY <div>Residents</div> <div>Visitors</div> <div>X Public Service Employees</div> <div>Businesses</div> <div>Commercial/Industrial</div> <div>Construction</div>	RATIONALE FOR SELECTION <ul style="list-style-type: none"> To eliminate or minimize the presence of pollutants in stormwater discharges from scrap recycling and waste recycling facilities. 		
YEAR	IMPLEMENTATION ACTIVITY		MEASURABLE GOAL
01/24/19 - 12/31/19	<ul style="list-style-type: none"> Continue recycling and storage procedures 		Recycle at least 80,000 pounds of metal per year
01/01/20 - 12/31/20	<ul style="list-style-type: none"> Continue recycling and storage procedures 		Recycle at least 80,000 pounds of metal per year
01/01/21- 12/31/21	<ul style="list-style-type: none"> Continue recycling and storage procedures 		Recycle at least 80,000 pounds of metal per year
01/01/22 - 12/31/22	<ul style="list-style-type: none"> Continue recycling and storage procedures 		Recycle at least 80,000 pounds of metal per year
01/01/23 - 12/13/23	<ul style="list-style-type: none"> Continue recycling and storage procedures 		Tarp and recycle 100% of accumulated recyclable metal annually.

	USE OF LICENSED APPLICATORS FOR HERBICIDES		GH-7
RESPONSIBLE AUTHORITY * Public Works Parks and Open Space	DESCRIPTION This program focuses on education and certification of County employees to reduce water quality impacts from pesticides. Education is provided on proper storage and application techniques. This certification program is administered by the Texas Department of Agriculture and provides information on alternative pest control techniques and explains dosage calculations. The certification program requires an annual exam and continuing education credits for recertification. The County's applicators are licensed as Noncommercial Applicators for restricted-use or state-limited-use pesticides. Noncommercial applicators must renew annually and obtain five CEUs each year with one credit each from two of the following categories: laws and regulations, integrated pest management or drift minimization. The County will require their applicators to maintain their licenses and attend annual training classes and retain copies of their licenses for submittal with the annual reports.		
APPLICABILITY Residents Visitors X Public Service Employees Businesses Commercial/ Industrial Construction	RATIONALE FOR SELECTION <ul style="list-style-type: none"> • Providing high-quality education to farmers, ranchers, and the public on all topics in agriculture and natural resource management. • Reduce contamination of water resources, reduce the severity of off-target impacts and guide chemical use while considering the specific needs of farming operations. 		
YEAR	IMPLEMENTATION ACTIVITY		MEASURABLE GOAL
01/24/19 - 12/31/19	<ul style="list-style-type: none"> • Annual training for applicators • Document training and copies of licenses 		At least 3 staff with applicator license
01/01/20 - 12/31/20	<ul style="list-style-type: none"> • Annual training for applicators • Document training and copies of licenses 		At least 3 staff with applicator license
01/01/21- 12/31/21	<ul style="list-style-type: none"> • Annual training for applicators • Document training and copies of licenses 		At least 3 staff with applicator license
01/01/22 - 12/31/22	<ul style="list-style-type: none"> • Annual training for applicators • Document training and copies of licenses 		At least 3 staff with applicator license
01/01/23 - 12/13/23	<ul style="list-style-type: none"> • Annual training for applicators • Document training and copies of licenses 		Maintain 100% of applicator licenses by staff members who applied for and received applicator training.
