Phase II (Small) MS4 Annual Report Form  
TPDES General Permit Number TXR040000

A. General Information

1. Permit No. TXR040035  
   Annual Report Year: Interim Permit Year (August 13, 2012 – August 12, 2013)
   
   Name of MS4 / Permittee: Collin County MS4
   
   Contact Name: Tracy Homfeld, P.E., CFM  
   Telephone Number: 972-548-3733
   
   Mailing Address: 4690 Community Ave, Suite 200, McKinney, Texas 75071
   
   E-mail Address: thomfeld@co.collin.tx.us

2. Is the named permittee relying on another entity/ies to satisfy some of its permit obligations?  
   ______ Yes  ____X____ No
   
   If Yes, provide the name(s) of other entity/ies and an explanation of their responsibilities (add more spaces or pages if needed):
   
   Name and Explanation: NA

3. Is the named permittee sharing a SWMP with other entities?  
   ______ Yes  ____X____ No
   
   a. If the answer to Number 3 is “Yes,” list all associated permit numbers and permittee names (add additional spaces or pages if needed):
   
   Permit Number: ______________________________  Permittee: ______________________________
   
   If the answer to Number 3 is “Yes,” is this a system-wide annual report including information for all permittees?  
   ____ Yes  __No
   
   Explanation, if any  

4. Has a copy of this annual report been submitted to the TCEQ Regional Office?  
   ___X__ Yes  ______ No
B. **SWMP Modifications and Additional Information**

Include a brief explanation if you check “Yes” to any of the following statements.

1. a. Changes have been made or are proposed to the SWMP since the NOI or the last annual report, including changes in response to TCEQ’s review.  
   _______ Yes  ____X___ No

   b. If the answer to Number 1.a. is “Yes”, has the TCEQ already approved the original SWMP?  
   _______ Yes  _________ No

   _TCEQ approved the SWMP on _______._

   c. If the answer to Number 1.a. is “Yes”, indicate whether an NOC (or letter) has been submitted to document the changes to the approved SWMP as required by the general permit. (Note that if an NOC is required, it must be submitted to the address shown on the NOC. Do not attach the original NOC form to this report.)  
   _______ Yes  ________ No

2. The MS4 has annexed lands since obtaining permit coverage.  
   _______ Yes  ____X___ No

3. A receiving water body is newly listed as impaired or a TMDL has been established. If yes, please explain. _____ Yes __X__ No

   _No stream segments that receive stormwater runoff from Collin County’s MS4 were newly listed on the 2012 303(d) list._

   _No TMDLs have been developed for receiving waterbodies to which Collin County MS4 discharges._

4. The MS4 has conducted analytical monitoring of storm water quality.  
   _______ Yes  ____X____ No

   Explain below or attach a summary to submit along with any monitoring data used to evaluate the success of the SWMP at reducing pollutants to the maximum extent practicable. Be sure to include a discussion of results.

   ________________________________________________________________________________________________
**C. Narrative Provisions**

1. Provide information on the status of complying with permit conditions:

<table>
<thead>
<tr>
<th></th>
<th>Yes</th>
<th>No</th>
<th>Explain</th>
</tr>
</thead>
<tbody>
<tr>
<td>Permittee is currently in compliance with the SWMP as submitted to and approved by the TCEQ.</td>
<td>X</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Permittee is currently in compliance with recordkeeping and reporting requirements.</td>
<td>X</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Permittee meets the eligibility requirements of the permit (e.g., TMDL requirements, Edwards Aquifer limitations, compliance history, etc.)</td>
<td>X</td>
<td></td>
<td>No TMDLs, customer compliance history rating of 10.62 (Satisfactory)</td>
</tr>
</tbody>
</table>

2. Provide a general assessment of the appropriateness of the selected BMPs:

   Has the permittee determined that any of the selected BMPs are not appropriate for reducing the discharge of pollutants in storm water?  
   _____ Yes  ____X____ No

   Provide explanation:

3. Describe progress towards reducing the discharge of pollutants to the maximum extent practicable (MEP). Summarize any information used (such as monitoring data) to evaluate reductions in the discharge of pollutants. Use a narrative description or table as appropriate:

<table>
<thead>
<tr>
<th>MCM</th>
<th>BMP</th>
<th>Parameter</th>
<th>Quantity</th>
<th>Units</th>
<th>Does BMP Demonstrate a Direct Reduction in Pollutants?</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td>(Yes / No / Explain)</td>
</tr>
</tbody>
</table>
Collin County is striving to reduce the discharge of pollutants to the maximum extent practicable through implementation of BMPs contained in our SWMP. No water quality information is available at this time to demonstrate a direct reduction in pollutants.

4. Provide a general evaluation of the program’s progress, including any obstacles or challenges encountered in implementing BMPs, meeting the program’s schedule, etc.:

All 40 BMPs included in our SWMP have been successfully implemented and measurable goals achieved.

5. Provide the number of construction activities (other than those where the permittee was the operator) that occurred within the regulated area as indicated via notices of intent or site notices:

During the Interim Permit Year, the County received information on 8 construction sites (other than County construction projects).

One (1) construction site notice (CSN) and 7 Notice of Intents (NOIs) were received. When the location of the construction sites were overlaid on the Urbanized Area (UA) Map for unincorporated Collin County, it was determined that none of the construction sites were located in Collin County’s UA (i.e., regulated area).

6. Does the permittee utilize the 7th MCM related to construction? _______ Yes  ___X___ No

If Yes, then provide the following information for this permit year:

a. The number of municipal construction activities authorized under this general permit: _________________________

b. The total number of acres disturbed for municipal construction projects: _________________________

Though the 7th MCM is optional, this must be requested on the NOI or on a NOC and approved by the TCEQ.
7. Requirements for Specific Minimum Controls Measures (MCMs):

   a. For MCM 1 - Public Education and Outreach, provide documentation of activities conducted and materials used to fulfill the requirements of this MCM.

   For MCM 1 - Public Education and Outreach, documentation of activities conducted and materials used are provided on the individual BMP Status pages. Documentation includes attendance sheets, meeting summaries, web page screen shots, copies of brochures, and other educational media. Copies are included on the enclosed CD.

   b. Also for MCM 1, provide documentation of the amount of resources used to address each group (e.g., visitors, businesses, etc.).

   For MCM 1, documentation of amount of resources that were used to address each sector of the community is documented in the individual BMP status pages.

   Residents: BMPs PE-1, PE-2, PE-3, PE-4
   Visitors: BMPs PE-2, PE-3
   Public Service Employees: PE-2, PE-3
   Businesses: PE-2, PE-3
   Commercial and Industrial Facilities: PE-2, PE-3
   Construction Site Personnel: PE-2, PE-3

   c. For MCM 3 – Illicit Discharge Detection and Elimination (IDDE), indicate whether you have developed a list of allowable non-storm water discharges, other than those already listed in the general permit. If you have developed a list and have made any changes to the local controls, conditions and/or programs being established for discharges, include this information below. If you do not have any changes for this permit year, indicate that this item is not applicable.

   For MCM 3 – Illicit Discharge Detection and Elimination (IDDE), Collin County has NOT developed a separate list of allowable non-storm water discharges and has adopted the list contained in the general permit as stated in Section 4.3.2 (page 9) of our SWMP.

8. Describe any proposed changes to the SWMP in the coming reporting year. The SWMP will be revised based on the reissued Phase II Small MS4 permit which is expected to be issued in December 2013.

9. Describe any activities planned for the next permit year / reporting cycle. The County will continue our current program until TCEQ reissues the Phase II Small MS4 permit at which time we will reassess our BMPs and measurable goals to meet new permit requirements. Our SWMP will be revised and an NOI submitted within 180 days of permit effective date or as required by the permit.
### D. Storm Water Management Program Status.

Date:  

1.0 PURPOSE OF PROGRAM

This Storm Water Management Program (SWMP) was developed for Collin County to reduce the discharge of pollutants in storm water runoff to the maximum extent practicable (MEP) in its Municipal Separate Storm Sewer System (MS4). This Program was developed with coordination between the County and the affected stakeholders to customize a program for Collin County that meets state and federal program requirements and also utilizes current activities, addresses issues that are important to the county, and is economically feasible.

2.0 STATUS OF PERMIT COVERAGE

Collin County submitted its NOI and SWMP to the Texas Commission on Environmental Quality (TCEQ) on February 8, 2008 for coverage under the Texas Pollutant Discharge Elimination System (TPDES) General Permit for Storm Water Discharges from Small MS4s, General Permit No. TXR040000.

Upon completion of TCEQ’s administrative and technical review and notification from the TCEQ Office of the Chief Clerk, the County complied with public notice requirements by publishing notice in the newspaper of largest circulation in Collin County. The Dallas Morning News is the newspaper of largest circulation.

The notice included the Executive Director of the TCEQ’s preliminary determination on the NOI and SWMP. The notice also included the following information:

- The legal name of the MS4 operator;
- Identification of whether the NOI is for a new small MS4 or a renewal of an existing operation;
- The County’s address
- A brief summary of the information included in the NOI (general location and description of classified receiving waters that receive discharges from the Small MS4);
- The location and mailing address where the public may provide comments to TCEQ;
- The public location where copies of the NOI and SWMP, as well as the General Permit and the Executive Director’s Fact Sheet, may be reviewed;

The Notice of Application For Small Municipal Separate Storm Sewer System, General Permit Authorization No. TXR040035 was issued by TCEQ on September 15, 2008. The Notice was placed in the Dallas Morning News on April 3, 2009. The public comment period began on April 3, 2009 and extended for thirty days. The TCEQ determined that there was not a significant public interest for a public meeting; therefore the public comment period ended on May 2, 2009. The TCEQ issued permit coverage on June 8, 2009 and is currently in effect.
3.0 ANNUAL REPORTING REQUIREMENTS

A concise annual report must be submitted by Collin County to the Executive Director of the TCEQ within ninety days of the end of each permit year of the permit term. The permit term began when the TPDES Small MS4 General Permit became effective on August 13, 2007. The permit years and deadlines for annual reports are specified below.

<table>
<thead>
<tr>
<th>Year</th>
<th>Reporting Cycle</th>
<th>Annual Report Due Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>5</td>
<td>8/13/2011 – 8/12/2012</td>
<td>11/12/2012</td>
</tr>
<tr>
<td>Interim Permit Year</td>
<td>8/13/2012 – 8/12/2013</td>
<td>11/12/2013</td>
</tr>
</tbody>
</table>

A copy of the annual report must be readily available for review by authorized TCEQ personnel upon request. The report must contain a number of elements including:

- Status of compliance with permit conditions, an assessment of the appropriateness of the identified BMPs, progress towards achieving the statutory goal of reducing the discharge of pollutants to the MEP, the measurable goals for each of the MCMs, and an evaluation of the success of the implementation of the measurable goals,
- Status of any additional control measures implemented by the permittee,
- Any MCM activities implemented before permit issuance may be included as part of the first year’s annual report,
- A summary of the results of the information (including monitoring data) collected and analyzed, if any,
- A summary of activities planned for the next reporting cycle,
- Proposed changes to the SWMP,
- Number of municipal construction activities authorized under this general permit and total number of acres disturbed,
- Number of non-municipal construction activities that occurred within the jurisdiction.

4.0 BMP IMPLEMENTATION STATUS

This report serves as the Interim Permit Year Annual Report for Collin County for the period August 13, 2012 through August 12, 2013 and contains those elements outlined above. The annual report is organized by Minimum Control Measures with one-page summaries of the Interim Permit Year activities. Documentation that the County has achieved the measurable goals are provided on the enclosed CD.
5.0 SUMMARY

A Storm Water Management Program (SWMP) was developed for Collin County for coverage under the Texas Pollutant Discharge Elimination System (TPDES) General Permit for Storm Water Discharges from Small MS4s. The purpose of the SWMP developed for Collin County was to reduce the discharge of pollutants in storm water runoff to the maximum extent practicable (MEP) in its Municipal Separate Storm Sewer System (MS4). This program was developed with coordination between the County and the affected stakeholders to customize a program for Collin County that meets state and federal program requirements and also utilizes current activities, addresses issues that are important to the County, and is economically feasible. As documented in the annual reports submitted to TCEQ, Collin County has implemented this SWMP effectively during the permit term.

The current Phase II (Small) MS4 permit (TXR040000) expired on August 12, 2012 and reissuance of the permit by TCEQ has been delayed. TCEQ published a notice in the Texas Register on April 13, 2012 announcing their intent to administratively continue permit coverage for all existing small MS4s. All existing small MS4s will need to continue to operate under the existing small MS4 general permit requirements until the permit is renewed. To that end, Collin County will continue its currently implemented BMPs and annual activities until permit renewal. This Interim Permit Year annual report covers activities from 8/13/2012 to 8/12/2013.
REPORTING PERIOD:  
AUGUST 13, 2012 – AUGUST 12, 2013  
INTERIM PERMIT YEAR

CLASSROOM STORM WATER EDUCATION WITH NPS MODELS

Interim Permit Year: PE-1

BMP DESCRIPTION
A classroom education program will be developed for Collin County to educate students on storm water related issues. The County will meet with representatives of Texas AgriLIFE Extension and the Heard Natural Science Museum and Wildlife Sanctuary to determine cooperative educational opportunities and review the available NPS models. The County will then meet with representatives of ISDs in the UA areas of Collin County to determine which materials they can incorporate into existing classes. School districts that serve the Collin County urbanized areas are primarily Lovejoy ISD, McKinney ISD, and Wylie ISD.

Section of Population Addressed: Residents

ACTIVITIES PLANNED FOR NEXT REPORTING PERIOD
• Update SWMP and BMPs

PROPOSED CHANGE
None

PROGRESS DURING CURRENT REPORTING PERIOD
Over the past year, Texas AgriLIFE Extension has held several educational classes for school aged children on topics related to storm water management. A total of eight (8) classes were held in schools throughout Collin County. A total of 471 students attended these classes on the subject of Water Quality Education. The curriculum included “The Incredible Water Journey”, and “Freddy the Fish”.

The County Sheriff’s Department conducts classroom educational programs that are focused on illegal dumping and its consequences on storm water quality. A total of seven (7) classes were held throughout Collin County and were attended by approximately 780 participants.

## BMP Description

Collin County’s website is nationally recognized and was named among the top county government portals in 2007. The County will develop a web page for their existing web site that specifically addresses storm water related issues. The Storm Water Web Site will promote and advertise upcoming Public Involvement events such as the Collin County Adventure Camp (PI-1), Stakeholders Meetings (PI-2), and Stream Clean-up Projects (PI-3) through an on-line Community Events Calendar. The web site will also publicize illicit discharge BMPs such as Promoting Used Oil Recycling (ID-6) and Recycling Centers (ID-7). The web site can be used to collect information submitted by the public regarding construction activities as required by TPDES regulations.

### Section of Population Addressed:
Residents, Visitors, Public Service Employees, Businesses, Commercial and Industrial Facilities, Construction Site Personnel.

### Activities Planned for Next Reporting Period
- Update SWMP and BMPs

### Proposed Change
None

### Progress During Current Reporting Period
The County continually updates the storm water website with links to related department web pages including the Engineering Department page (http://www.co.collin.tx.us/engineering/stormwater/index.jsp). During previous reporting years, the website was updated to promote used oil recycling in addition to general information about the County’s Storm Water Management Program that is pertinent to all sectors of the community. Storm water related links are provided for online access to Collin County’s TPDES Small MS4 General Permit and SWMP, Annual Reports, NCTCOG wet weather monitoring results, locations of recycling centers, illegal dumping information, and subdivision regulations. Links are also provided to the EPA and TCEQ storm water websites for additional information on NPDES/TPDES regulations. The website promotes the County’s Storm Water Hotline (Report-A-Polluter) and informs the public of what to report and how to report storm water violations. Using the link for used oil recycling on the website, members of the community can find out nearest used motor oil recycling centers to recycle used oil as well as benefits of recycling used oil. During this reporting year, the County updated information and maintained active links on the website.

### Implementation Activity
- Develop a web page to promote used oil recycling
- Maintain web-site links

### BMP Description

These are multi-page printed materials used to convey detailed information on specific topics related to storm water management. The brochures will be distributed to kiosks located at the Collin County Government Center and the Public Works Department. The brochures will also be available in PDF format on the County’s Storm Water Web Page (PE-2). The County will coordinate with local businesses to provide additional means of distributing the brochures at designated locations within these businesses. Targeted distribution of brochures will also be used to address specific issues. The County has several existing brochures and will develop a county-wide catalog of available brochures and develop 3 new brochures for distribution in Years 3 and 5.

### Section of Population Addressed:

Residents, Visitors, Public Service Employees, Businesses, Commercial and Industrial Facilities, Construction Site Personnel.

### Activities Planned for Next Reporting Period

- Update SWMP and BMPs

### Proposed Change

None

### Progress During Current Reporting Period

The County continued to distribute existing brochures that promote the prevention of storm water pollution at construction sites and in the community. The construction storm water pollution prevention plan (SWPPP) brochure advertises Collin County’s Storm Water Website with other helpful links to resources for developing a construction SWPPP and tips for preventing storm water pollution at construction sites. This brochure is intended to educate contractors, builders and developers on TCEQ storm water requirements for construction sites. Copies of the construction site brochure with details on preventing storm water pollution at construction sites are distributed as part of the commercial building permit application.

The community brochures provide residents with tips for preventing storm water pollution. The County took advantage of one of the NCTCOG’s Regionally Developed Initiatives for public education. The County chose to distribute the brochure entitled “The Dirty Dozen” with 12 tips to prevent storm water pollution. “The Dirty Dozen” brochure has been added to all permit packets distributed from Collin County Development Services. It has also been added to the Permit packages online from the Development Services webpage.

**BMP DESCRIPTION**

The Texas AgriLIFE Extension conducts a variety of environmental education activities (Pond Management, Urban Rancher, Wetlands Workshop, 4-H Lawn and Safety Education Program, Master Gardeners) throughout the County.

The Texas AgriLIFE Extension of Collin County is a statewide educational agency and locally is a partnership between Collin County Commissioners Court, the Texas A&M University System and the United States Department of Agriculture. The County will coordinate with County AgriLIFE Extension staff to report annual educational activities in Collin County that are storm water related.

A representative from Collin County will attend two Leadership Advisory Board Meetings annually and will advocate the use of more storm water related topics.

**Section of Population Addressed:** Residents

**ACTIVITIES PLANNED FOR NEXT REPORTING PERIOD**

### NCTCOG STORM WATER PUBLIC EDUCATION TASK FORCE

**BMP DESCRIPTION**

The NCTCOG has assembled a Public Education Task Force to develop and distribute educational materials and to conduct community outreach activities that will inform the public within the MS4 service area. The targeted audience includes visitors to the County as well as residents, business owners, commercial and industrial facilities, construction site personnel and public service employees. Outreach activities will seek to inform the public about storm water impacts on water quality, hazards associated with illegal discharges and improper disposal of waste and steps that citizens can take to reduce pollutants in storm water runoff. Collin County will participate in the task force meetings and regionally developed initiatives (RDIs) for public education.

**Section of Population Addressed:** RDIs developed during Year 5 target Residents, Businesses, Commercial and Industrial Facilities, and Construction Site Personnel.

### ACTIVITIES PLANNED FOR NEXT REPORTING PERIOD

- Update SWMP and BMPs

### PROPOSED CHANGE

**NONE**

### PROGRESS DURING CURRENT REPORTING PERIOD

The County attended the April 30, 2013 Task Force meeting during the reporting year. The agenda items and sign in sheets for the April task force meeting are attached. Agenda items for the meeting included Fats, Oils, and Grease (FOG) brochures, Educator’s Toolbox, Pet Waste PSA, Texas SmartScape, Cooperative Purchase, and a Municipal Roundtable. The County participated in the selection of RDIs for the upcoming year and the preparation of the cooperative purchase list.

The County stayed informed of the Task Force meeting held on August 6, 2013. Agenda items for that meeting included Pet Waste education, Texas SmartScape bookmark redesign, and an update on the Educator’s Toolbox. The County is taking advantage of two Regionally Developed Initiatives (RDIs) – “The Dirty Dozen” brochure and “Preventing Stormwater Pollution at Construction Sites” brochure. Copies of the “Preventing Stormwater Pollution at Construction Sites” brochure are distributed as part of the commercial building permit application. “The Dirty Dozen” brochure has been added to all permit packets distributed from Collin County Development Services.

**COLLIN COUNTY ADVENTURE CAMP**

**INTERIM PERMIT YEAR**

<table>
<thead>
<tr>
<th>Responsible Authority</th>
<th>* Engineering</th>
</tr>
</thead>
</table>

**BMP DESCRIPTION**

In 1995 representatives of the Collin County Commissioner’s Court, the YMCA, the Heard Museum, and school districts initiated a plan to construct, and operate a camp to provide life enhancing outdoor educational and recreational experiences in and for Collin County children and families. County bond funds were used to acquire land and construct camp facilities. The Camp is operated by the Metropolitan Dallas YMCA. The Camp opened in 2006 and its first Open House “Community Day” was attended by 500 community residents. By the Fall of 2006, over 7,000 students had attended Collin County YMCA Adventure Camp for outdoor education, and over 3,000 family and community guests attended for conferences and retreats. The Camp offers several lesson plans that are well suited for storm water education including Earth Processes and Water Ecology. In the Water Quality Lab students assess the quality of the lake water through biological sampling (using pond nets to find aquatic life), physical tests (using a Secchi disc and thermometer), and chemical tests (for dissolved oxygen and carbon dioxide).

**Measurable Goal Successfully Implemented?**

| Yes | No |

**PROGRESS DURING CURRENT REPORTING PERIOD**

School Districts represented at the Collin County Adventure Camp for the reporting year included: Plano ISD, McKinney ISD, Allen ISD, Wylie ISD, Dallas ISD, Lovejoy ISD, Princeton ISD, Community ISD, Anna ISD, Blue Ridge ISD, Melissa ISD, Garland ISD, Grapevine-Colleyville ISD, Carrollton-Farmers Branch ISD, Richardson ISD, Frisco ISD as well as some private schools. 6,577 students participated in camps throughout the year. Ninety percent of the participants were 5th grade students. The remainder were a mixture of 2nd through 7th grade students. Storm water topics included “Taming the Land” and “Learning the Lake”. These lesson plans were offered as multi-day exercises in a camp setting, but were open to day groups as well. The County will continue to track the number of school children that participate in these programs as a measurable goal for reporting progress.

**Implementation Activity**

- Offer lesson plans to participating ISDs

**Measurable Goal**

STORM WATER MANAGEMENT PROGRAM – ANNUAL REPORT

Reporting Period:
August 13, 2012 – August 12, 2013

Storm Water Stakeholders Committee

BMP Description
Collin County formed a Storm Water Stakeholders Committee (SWSC) to involve the public in the development of their Storm Water Management Program. The Committee consists of invitees from County staff, municipal storm water coordinators, County Extension, school districts, environmental education specialists from the Heard Natural Science Museum, North Texas Municipal Water District, Texas A&M Urban Solutions Center, developers and homebuilders. The SWSC met to review possible BMPs and to vote on which BMPs are most applicable to Collin County. The committee will meet annually in October to review the County’s Annual Report to TCEQ, evaluate the effectiveness of selected BMPs and suggest changes (if necessary).

Activities Planned for Next Reporting Period
- Update SWMP and BMPs

Proposed Change
NONE

Progress During Current Reporting Period
The County held a meeting of the Storm Water Stakeholders Committee (SWSC) made up of County staff, community leaders from the surrounding cities, educational professionals and homebuilders/developers. The meeting was held in the Commissioner’s Court chambers at the Collin County Administration Building located at 2300 Bloomdale Road in McKinney. Twenty one representatives attended the SWSG meeting on October 23, 2012 to review the County’s Year 5 progress toward meeting implementation goals and review the Year 5 Annual report prior to submission to TCEQ. Copies of the meeting minutes, presentation handouts and attendance sheet are attached.

The County also participates in the Collin County MS4 Stormwater Forum that was organized in February 2013 and meets quarterly to discuss stormwater issues. All MS4 operators in Collin County are invited to attend. The County hosts the meetings at the County Administration Building (Bloomdale Courthouse). Meetings were held on 2/14/13, 5/15/13, and 8/13/13 (agendas attached).

### BMP Description

Collin County Road and Bridge Department will coordinate stream cleanup projects with various local volunteer groups and organizations.

Specific sites will be selected based on impact by trash, especially those areas with heavy pedestrian and vehicular traffic. Access will also guide site selection for convenience of the volunteers and to minimize permission requirements.

### Activities Planned for Next Reporting Period

- Update SWMP and BMPs

### Proposed Change

None

### Progress During Current Reporting Period

The County selected six locations for stream cleanups based on illegal dumping reports/complaints. The Stream Cleanup Event was held on July 20, 2013 at the six stream crossing locations listed below.

1. CR 825 at Pot Rack Creek – retrieved 200 lbs
2. CR 825 at Bear Creek – 800 lbs
3. CR 580 at Desert Creek – 600 lbs
4. CR 470 at Sister Grove – 100 lbs
5. CR 373, CR 372 and CR 374 at Hurricane Creek – 200 lbs
6. CR 125 at Honey Creek – 380 lbs

Fifteen volunteers and staff participated in the event and 1.14 tons of garbage and debris was removed from the locations. Items that were collected during the cleanup event includes clothing, household trash, construction debris, tires, fencing material, home appliances, and furniture. The material collected was disposed at 121 Regional Disposal Facility in the City of Melissa. Photos of the cleanup event at each location are attached along with a receipt from the disposal facility.

**BMP DESCRIPTION**

The Public Works Council (PWC), initially established as the Public Works Advisory Committee in 1984, provides expertise and support to the NCTCOG on a wide range of local public works issues. The PWC provides continuing advice regarding the Public Works Construction Standards and comprehensive and consistent storm water management through iSWM. The PWC meets several times per year and hosts a Public Works Roundup annually. The PWC structure has 16 seats for the nine cities over 100,000 population (two seats each for the three largest cities) and the four largest counties including Collin County. The Director of Engineering of Collin County is a member of the PWC.

<table>
<thead>
<tr>
<th>STORM DRAIN SYSTEM MAPPING</th>
</tr>
</thead>
<tbody>
<tr>
<td>ID-1</td>
</tr>
</tbody>
</table>

**BMP DESCRIPTION**

To facilitate their illicit discharge detection and elimination program, Collin County will develop a storm drain system map, which identifies the location of all outfalls and the names and locations of the waters of the U.S. to which they drain. Collin County will develop a Geographic Information System (GIS) map. Supplemental information on outfall locations will be derived from visual inspections along stream banks. Precise locations of outfalls will be determined through the inspection of aerial photographs and field verification with a Global Positioning System (GPS). The County will facilitate the development of a county-wide system map by meeting with GIS personnel from municipalities in the County and consolidating the available GIS data. County personnel will attend NCTCOG training on outfall mapping.

**ACTIVITIES PLANNED FOR NEXT REPORTING PERIOD**

- Update SWMP and BMPs

**PROPOSED CHANGE**

NONE

**PROGRESS DURING CURRENT REPORTING PERIOD**

GIS contacts for the Phase I and Phase II cities were identified. Existing Phase II communities in Collin County include Allen, Carrollton, Fairview, Frisco, Lowry Crossing, Lucas, McKinney, Murphy, New Hope, Parker, Richardson, Sachse and Wylie. The two Phase I cities in Collin County are Dallas and Plano. The IT/GIS Department coordinated with local MS4s to obtain and share available data. Other than McKinney and Frisco, many Phase II cities are in the infancy stages of GIS mapping. Several communities are willing to consider using a standardized list of attribute data to provide consistency and allow for sharing of data. The current County GIS database includes roads and culverts. Within unincorporated Collin County, the storm drain system consists exclusively of roadside ditches so the current GIS database characterizes the storm drain system that Collin County is responsible for maintaining. This GIS database is updated regularly based on new roads and culverts installed in unincorporated Collin County. Outfall maps for the entire UA area within the County’s jurisdiction were developed during the first permit cycle. The County will update outfall/storm system maps based on the 2010 census during the next permit cycle and coordinate with any new MS4 communities through the MS4 Forum discussed under BMP PI-2.

**PROGRESS DURING CURRENT REPORTING PERIOD**

County GIS staff performed a mapping analysis to identify outfalls in Collin County's UA areas on Muddy Creek and tributaries of Lake Lavon (near Lucas, Princeton, Saint Paul, and Wylie). The outfall map for this area is attached. Preliminary analysis indicates ten (10) storm water outfalls on Muddy Creek and tributaries of Lake Lavon (near Lucas, Princeton, Saint Paul, and Wylie) for Year 5 visual monitoring. Visual monitoring has been done for those 10 outfalls and no indicators were present to indicate the presence of any pollutant at any of the outfalls. The Outfall Reconnaissance Inventory / Sample Collection Field Sheets are attached.

### ILLICIT DISCHARGE INVESTIGATIONS

#### BMP DESCRIPTION

The County lacks the legal authority to prohibit illicit discharges and illegal connections in the unincorporated UA. The County will seek voluntary compliance through Visual Monitoring of Outfalls (ID-2) to detect illicit discharges followed up by investigations such as dye or smoke testing (as appropriate) to determine the source of the illicit discharge to its MS4. As the County will not have “right-of-entry” typically granted by ordinances, the County will seek the cooperation of suspected dischargers in identifying and removing illegal connections. If voluntary compliance cannot be achieved, suspected illicit discharges will be reported to the TCEQ for follow-up investigations.

#### PROGRESS DURING CURRENT REPORTING PERIOD

The County established a local number (McKinney) and a Metro number as well as an email link that the community can use to provide comments to the Engineering Department concerning construction activities within the MS4. The hotline is advertised on the County’s web site. There were no calls or e-mails received on the hotline during the reporting year to report illicit discharge.

#### Implementation Activity

- Investigate suspected illicit discharges (as necessary)
- Seek voluntary compliance or refer to adjacent MS4 or TCEQ

#### Measurable Goal

- List of investigations
- List of compliance or referral

#### Completion Date

8/12/2013

Documentation Attached  

- List of Attachments: Web page screen shot of information to report illicit discharge
NCTCOG is assisting local entities through a cooperative regional monitoring program for collection of wet weather water quality data. The regional program includes the Phase I cities of Dallas, Fort Worth, Arlington, Garland, Irving, Plano, Mesquite; the local districts of the TxDOT; and the North Texas Tollway Authority (NTTA). The regional monitoring plan calls for quarterly sampling of up to three monitoring stations in each of the nine watersheds per year for three years beginning January 1, 2007. A total of 300 sample events are anticipated to be collected. Each sample will be analyzed for 18 parameters. Although this monitoring program was designed to meet the permit requirements of Phase I cities, it will also benefit Phase II cities and may be used to determine long-term water quality trends. The County will obtain and review the NCTCOG annual reports for the monitoring and make it available to the public through links on their web page.

**ACTIVITIES PLANNED FOR NEXT REPORTING PERIOD**
- Update SWMP and BMPs

**PROGRESS DURING CURRENT REPORTING PERIOD**
The County obtained a copy of the NCTCOG’s annual report summarizing the results of the cooperative wet-weather monitoring program. The County reviewed the annual report and posted a link to the report on the Engineering Web Page to inform the public of the results.

The Collin County Sheriff’s office currently investigates illegal dumping reports. The County web site advertises the report line, NCTCOG hotline number and the “Don’t Mess with Texas” web site for reporting (http://www.co.collin.tx.us/public_works/illegal_dumping.jsp). The GIS Department keeps a log of all illegal dump sites in the County. The County Sheriff’s office investigated 365 reports of illegal dumping during the reporting year. A list of those investigations is attached. A map of known illegal dump sites is also attached.

STORM WATER MANAGEMENT PROGRAM – ANNUAL REPORT

REPORTING PERIOD:
AUGUST 13, 2012 – AUGUST 12, 2013

RECYCLING CENTERS

INTERIM PERMIT YEAR
ID-7

BMP DESCRIPTION
Collin County began its first recycling program in 2004 through a grant issued by the North Central Texas Council of Governments. Collin County currently has five recycling containers strategically located throughout unincorporated areas and smaller cities. Recycling promotes a cleaner county by helping keep roads and bridges free of debris because much of the trash along county roads is recyclable material. Brochures have been developed to promote the recycling centers throughout the County. Acceptable recyclable items include newspapers, magazines, junk mail, paper bags, glass, office paper, cardboard, soft cover books, catalogs, plastic bags, aluminum/tin cans, and plastic containers.

ACTIVITIES PLANNED FOR NEXT REPORTING PERIOD
• Update SWMP and BMPs

PROPOSED CHANGE
None

PROGRESS DURING CURRENT REPORTING PERIOD
The recycling locations are listed on the Public Works Department web page. There were 5 locations where recycling bins were available to residents of Collin County during the reporting year. The web site includes an interactive location map of each recycling center that allows the user to zoom and pan in the map window. Besides the center locations, the map includes many other features such as aerial photography, cities, roads, streams, etc. Tracking procedures were developed to document the quantity of material recycled. A total of 629 tons of recycled material was collected during the reporting year. The breakdown by site is Melissa (92 tons), Branch (230 tons), Nevada (96 tons), Weston (176 tons), and Copeville (35 tons).

**HAZARDOUS MATERIAL SPILL RESPONSE**
ID-8

## BMP DESCRIPTION
The County has a HAZMAT truck and certified technicians for spill response and will continue their Spill Response Program throughout the County in unincorporated areas. Collin County also coordinates spill response with the City of Plano, who has a dedicated fire station that provides 24-hour, 7 days per week spill response.

BMP DESCRIPTION
The County administers the On-Site Sewage Facility (OSSF) program in Collin County. The County has regulations that help to reduce the number of failing septic systems. The County is in charge of licensing and inspection of OSSFs. Each new homeowner must re-register their septic system. Upon transfer of utility, the electrical provider in the area requires that the septic system be inspected prior to setting up a new account. The County maintains a database of all OSSF inspections.

PROGRESS DURING CURRENT REPORTING PERIOD
Collin County Development Services Department administers the On-Site Sewage Facility (OSSF) program in the County and conducts inspections for new and malfunctioning systems. The County conducted 69 inspections of malfunctioning systems and 466 inspections for new systems during the reporting year. The County maintains a tracking system that records all work orders related to OSSF inspections. The tracking system documents the address of the system and comments regarding the complaint such as “septic surfacing on top of ground”, “odor” etc. The tracking system also documents the County response crew, the start and end dates and the Job Order Status. The tracking system may be queried for specific data ranges. The County is also able to generate a summary report for each inspector or a summary report for all OSSF inspections.

INTERIM PERMIT YEAR
C-1

REVIEW OF
EROSION CONTROL SECTION OF
SUBDIVISION REGULATIONS

BMP DESCRIPTION
The Phase II Final Rule requires that counties develop, implement and enforce a program to reduce pollutants in runoff from construction activities that disturb land areas of one acre or greater to the extent allowable under state and local law. The County will review existing subdivision regulations for compliance with the new CGP and determine the extent to which erosion and sediment controls can be required, as well as sanctions to ensure compliance, to the extent allowable under State and local law. This may require modification of the County’s plan review procedures (C-2) and site inspection procedures (C-3).

PROGRESS DURING CURRENT REPORTING PERIOD
Subdivision Regulations have been updated as per the recommendations by the County Planning Board. The Collin County Commissioners Court conducted a public hearing regarding the proposed update of the Collin County Subdivision Regulations on November 5, 2012 and the public notification about the public hearing was published on October 7, 2012 and October 21, 2012. The public hearing allowed interested parties to address the proposed revisions to Collin County Subdivision Regulations. The Collin County Subdivision Regulations were adopted by the Collin County Commissioners Court following the public hearing. The signed Court Order (No. 2012-828-11-05) is attached.

AUGUST 13, 2012 – AUGUST 12, 2013

INTERIM PERMIT YEAR
C-2

EROSION CONTROL PLAN REVIEW PROCEDURES

BMP DESCRIPTION
All of the urbanized area in the unincorporated areas of Collin County is contained within the ETJs of the Cities of Lucas, McKinney and Wylie, and the County has interlocal agreements with each of these cities to regulate subdivisions in their ETJ, in accordance with House Bill 1445 and Chapter 242 of the Local Government Code. As such, inside the ETJs, plans which conform to that City’s stricter requirements are submitted to the City, including erosion and sediment control plans, which the City reviews. For subdivisions inside the ETJ that disturb 1 acre or greater, the CGP requires the development of a SWPPP and construction site notices (CSN) or NOIs are to be provided to the MS4 operator (County). The County will track the CSNs and NOI/NOC/NOTs submitted by construction contractors.

For the unincorporated areas, the County’s authority is limited to commercial building permits, which includes submittal of plans and a SWPPP for disturbances between 1 and 5 acres. For each SWPPP submitted, the County will verify if it is in the Collin County urbanized area, and if so will provide additional inspection.

ACTIVITIES PLANNED FOR NEXT REPORTING PERIOD
• Update SWMP and BMPs

PROPOSED CHANGE
NONE

PROGRESS DURING CURRENT REPORTING PERIOD
During the reporting period, the County received information for new subdivisions or commercial building permits and roadway construction projects. The County’s tracking system records the contractor, project type, location, and the date the CSN and NOI/NOC/NOT are received. Based on the records, 4 CSNs and 7 NOIs have been received. The Engineering Department confirms that the documents received from contractors are for construction activities within the UA under Collin County jurisdiction and performs a review of the erosion and sediment control plans and off-site drainage plans. None of the construction sites were located within the UA under the County’s jurisdiction.

**INTERIM PERMIT YEAR**
C-3

---

### BMP DESCRIPTION

As described in BMP C-2, the County has interlocal agreements with the Cities of Lucas, McKinney and Wylie granting them exclusive jurisdiction to regulate subdivisions in their ETJs.

For areas outside the ETJs, Collin County’s current subdivision regulations require that the developer notify the Engineering department 48 hours prior to commencement of construction and gives Engineering the authority to inspect the construction of all drainage structures or streets during the course of construction. If authorized outside of the ETJ (see BMP C-1), the County’s inspection procedures will be modified to include on-site inspections to ensure compliance with the erosion control regulations. The County will train their building inspectors to perform visual storm water BMP inspections in conjunction with other inspections. Inspectors will attend the NCTCOG’s training program (BMP C-5).

---

### ACTIVITIES PLANNED FOR NEXT REPORTING PERIOD
- Update SWMP and BMPs

---

### PROGRESS DURING CURRENT REPORTING PERIOD

Inspection and tracking procedures have been implemented by the County. A general inspection checklist has also been developed and is used to document inspections and compliance with CGP provisions. 129 inspections were conducted during the reporting year for county roadway projects (list attached). Copies of the inspection reports are available upon request.

Two inspectors from Collin County Public Works Department attended the NCTCOG training “Stormwater Pollution Prevention Practices During Construction” in Arlington on 1/29/13.

### BMP Description
The Phase II Small MS4 General Permit requires that the County develop procedures for the receipt and consideration of public inquiries, concerns, and information submitted regarding local construction activities. The County is required to consider the information submitted but may not need to follow-up or respond to every complaint or concern. The County is required to adopt procedures to acknowledge receipt of information (verbal and written). A tracking process will be required to document the nature of the information submitted and any follow-up activities (if warranted). This BMP will be coordinated with several of the public education or public involvement BMPs. A dedicated email address (engineer@co.collin.tx.us) and the Engineering Department phone number will be used for receipt of written and verbal comments and inquiries.

### Activities Planned for Next Reporting Period
- Update SWMP and BMPs

### Proposed Change
None

### Progress During Current Reporting Period
The County established a local number (McKinney), a Metro number and an email link for the community to provide comments to the Engineering Department concerning construction activities within the MS4. The hotline is advertised on the County’s web site. There were no calls or e-mails received on the hotline during the reporting year.

REPORTING PERIOD:  
AUGUST 13, 2012 – AUGUST 12, 2013

INTERIM PERMIT YEAR

NCTCOG INSPECTOR CERTIFICATION TRAINING  
C-5

BMP DESCRIPTION
The NCTCOG sponsors training sessions for construction storm water inspectors that focus on the TPDES CGP, which became effective on March 10, 2003. The goal of these training sessions is to increase compliance by increasing familiarity with the CGP requirements and reviewing standard practices. The training includes discussion of site development plans, design calculations, proper BMP selection and installation as well as inspection requirements and regulations.

The County will send two lead inspectors to the NCTCOG’s training in Year 3 and hold internal training classes for inspectors. In subsequent years, the County will send newly hired inspectors to a construction training class within 1 year of hire (depending on the scheduled training dates). The NCTCOG training class, Storm Water Pollution Prevention During Construction, or equivalent training class will be utilized.

**BMP DESCRIPTION**
The TPDES Small MS4 general permit requires jurisdictions to provide for the long-term operation and maintenance of the post-construction BMPs that are constructed in new development and redevelopment projects that disturb areas of one acre or greater.

**ACTIVITIES PLANNED FOR NEXT REPORTING PERIOD**
- Update SWMP and BMPs

**PROPOSED CHANGE**
None

**PROGRESS DURING CURRENT REPORTING PERIOD**
County construction activities within the MS4 has resulted in the installation of BMPs to stabilize areas while construction is taking place. The County is currently mapping these BMP structures to establish a data base of temporary BMPs that need to be removed once vegetation has been established and the area stabilized. The Public Works and GIS teams have created an inventory map and list to track the location of temporary BMPs. The County is currently updating the inventory list and the map.

O&M practices and schedules have been developed based on EPA recommendations for different BMPs (detention/retention practices, infiltration facilities, dry swales, grassed channels, biofilters, filter strips, bioretention etc.). These O&M procedures will be implemented when post-construction BMPs that need County maintenance are identified.

Road side ditches which are part of the County’s MS4 consist of grassed lined channels that are maintained under Good Housekeeping BMP (GH-2). No permanent BMPs have been identified other that the grass lined channels.

BMP DESCRIPTION

The storm drain system in unincorporated Collin County consists of roadside ditches that are maintained by the County Public Works, Road and Bridge Department as part of the ROW maintenance program. The purpose of this management practice is to reduce the amount of debris, trash and other pollutants in the storm drain system through maintaining and cleaning of roadside ditches and ROWs on a regular basis.

The Road and Bridge Division currently maintain roadside ditches and ROW through a periodic inspection and preventative maintenance program. The County utilizes log books and a work order system to document the preventative maintenance of the ROW.

Soil material removed from the ROW is used as fill if possible and stabilized with erosion control mats and vegetated with a seed mixture. If contamination is suspected, the material is tested and taken to an approved site for disposal.

Trash and floatables are bagged for disposal. The County currently uses the North Texas Municipal Water District landfill in Melissa for disposal of floatables.

PROGRESS DURING CURRENT REPORTING PERIOD

The County continued its on-going program of inspection, cleaning and maintenance of the ROW. The Public Works Road and Bridge Department maintains a log of all activities conducted. Monthly Reports for the reporting year have been generated for all maintenance activities, defined by County Road number and activity type.

Roadway / Bridge Maintenance

BMP Description
The goal of this management program is to reduce or eliminate pollutant loads which may result from the routine maintenance or repairs to roadways and bridges. Routine maintenance of roads and bridges and maintenance of erosion and sediment control BMPs can alleviate the impacts of various pollutants including heavy metals, hydrocarbons and sediment that are typically deposited on streets and bridges.

The County uses Curlex erosion control mats and socks that are filled with aspen shavings at all construction sites and complies with the TPDES Construction General Permit (CGP). After maintenance activities are completed, the areas are seeded with a seed mixture consisting of Rye, Bermuda, Foxtail, or Fescue depending on the season for stabilization.

Soil material removed during roadway and bridge maintenance is used as fill if possible and stabilized with erosion control mats and vegetated with a seed mixture. If contamination is suspected, the material is tested and taken to an approved site for disposal.

Trash and floatables are bagged for disposal. The County currently uses the North Texas Municipal Water District landfill in Melissa for disposal of floatables.

MATERIAL STORAGE FOR METAL

BMP DESCRIPTION
This management practice involves the proper storage of materials at County facilities to prevent or reduce the discharge of pollutants to storm water. These practices typically involve storing metals in a designated area, under cover to reduce exposure to storm water, installing secondary containment, inspecting the storage areas frequently and training employees. The County will design material storage areas for metal that is stored at three of the County facilities, the Public Works Service Center, the Farmersville County facility and the Weston County facility.

Activities Planned for Next Reporting Period

• Update SWMP and BMPs

Proposed Change

None

PROGRESS DURING CURRENT REPORTING PERIOD

The County was able to recycle much of the stored metal through contracts with Garland Steel Metal Recycler. Metal is recycled on a monthly basis to minimize storage times. Any metal that requires temporary outdoor storage is covered with a tarp to prevent contact with storm water as shown in the attached pictures.

The County recycled a total of 160,040 pounds of metal during the reporting year.

STORM WATER MANAGEMENT PROGRAM – ANNUAL REPORT

MATERIAL STORAGE FOR USED TIRES

GH-6

BMP DESCRIPTION

The County has secured a private contract for disposal of used tires and will implement procedures to ensure that the inventory of used tires remains small and the storage times are reduced. The need for a covered material storage area will be reassessed on an annual basis for two of the County facilities, the Public Works Service Center and the Farmersville County facility. If necessary, the County will design and construct a material storage area for used tires.

To assess the need for covered storage, the County will conduct an inventory every 6 months of the numbers of used tires and the length of storage. A suitable marking system will be used to mark the tires to indicate the date that the used tire was placed in storage area and all efforts will be made to minimize the storage times.

ACTIVITIES PLANNED FOR NEXT REPORTING PERIOD

• Update SWMP and BMPs

PROPOSED CHANGE

None

PROGRESS DURING CURRENT REPORTING PERIOD

The County recycled 573 used tires during the reporting year (Passenger/Lt Truck= 190, Truck=383, Heavy off Roads= 0). The County keeps storage times to a minimum with 20 scheduled pickups during the year depending on need. Currently, the discarded tires are picked up on at least a monthly basis and they are tarped during storage to prevent exposure to rain water. Big City Tire Service and Southern Tire Mart are contracted for used tire recycling.

STORM WATER MANAGEMENT PROGRAM – ANNUAL REPORT

USED OIL COLLECTION AND RECYCLING

INTERIM PERMIT YEAR
GH-7

BMP DESCRIPTION

Used oil collection and recycling programs provide a responsible alternative to disposal that is beneficial to the environment and public health. Collin County currently collects and recycles used motor oil and filters from the Public Works Service Center. The County will document the recycling of automotive fluids and provide trip tickets from the disposal contractor.

PROGRESS DURING CURRENT REPORTING PERIOD

The County recycled a total of 2,685 gallons of used motor oil and six (6) 55-gallon drums of used oil filters during the reporting year on the following dates: 8/22/12, 10/8/12, 11/14/12, 1/9/13, 2/19/13, and 6/4/13. United Recyclers provides non-hazardous special waste manifests to document the quantities of used oil and filters recycled. Copies of the waste manifests are attached.

<thead>
<tr>
<th>USE OF LICENSED APPLICATORS FOR HERBICIDES</th>
<th>GH-8</th>
</tr>
</thead>
</table>

**BMP DESCRIPTION**

This program focuses on education and certification of County employees to reduce water quality impacts from pesticides. Education is provided on proper storage and application techniques. This certification program is administered by the Texas Department of Agriculture and provides information on alternative pest control techniques and explains dosage calculations. The certification program requires an annual exam and continuing education credits for recertification. The County’s applicators are licensed as Noncommercial Applicators for restricted-use or state-limited-use pesticides. Noncommercial applicators must renew annually and obtain five CEUs each year with one credit each from two of the following categories: laws and regulations, integrated pest management or drift minimization. The County will require their applicators to maintain their licenses and attend annual training classes and retain copies of their licenses for submittal with the annual reports.

**PROGRESS DURING CURRENT REPORTING PERIOD**

The County sent 3 staff members to training for maintenance of their Noncommercial Political Pesticide Applicator License. The licenses for County staff were issued on 9/30/12, 11/30/12, and 2/28/13 and expire one-year from date of issuance. Licenses are Texas Department of Agriculture Category 5 for “Right-of-Way Pest Control.”

<td>Spill Prevention Training</td>
<td>GH-9</td>
</tr>
</tbody>
</table>

**BMP Description**
The County has 21 employees that are trained and certified in spill prevention. The 8-hour training is conducted annually by Sigma Consultants. The County has spill response kits at the service centers with a 30’ long sock boom for large spills and absorbent pads for smaller spills. The spill response kits contain Tyvex suits and personal protection equipment for employee safety. The annual spill prevention training refreshes the employee’s knowledge of spill prevention, cleanup and personal protection equipment.

STORM WATER MANAGEMENT PROGRAM – ANNUAL REPORT

Reporting Period:
August 13, 2012 – August 12, 2013

Vehicle Maintenance

Interim Permit Year
GH-10

BMP Description
This BMP involves the development of a program that focuses on controlling pollutants and reducing storm water impacts from the County's automobile maintenance shop. Vehicle maintenance facilities typically contain significant quantities of fuels, solvents and motor oils and often generate large amounts of waste. Preventative measures such as good housekeeping, spill control, parts cleaning and recycling of automotive fluids including antifreeze, waste oil, transmission and hydraulic fluid are necessary to minimize the impacts of this generated waste.

The Collin County Public Works Service Center performs maintenance on County vehicles. A central floor drain within the fleet maintenance shop drains through an oil/sand separator before being discharged to the sanitary sewer. The soil/sand separator must be maintained on a regular basis to function properly. The County will continue to maintain the oil/sand separator and document these maintenance activities as part of their SWMP.

The County treats oil/sand filter with Power Play Active Bacteria that breaks down any fuels, solvents and motor oil. No clean out and disposal is necessary. The County applies treatment based on manufacturers’ specifications and documents dates of treatment in a maintenance log. Annual testing of TPH allows staff to access the treatment effectiveness and modify dosage (if needed).

Activities Planned for Next Reporting Period
• Update SWMP and BMPs

Proposed Change
None

Progress During Current Reporting Period
The oil/sand separator located at the maintenance shop was inspected as scheduled during the reporting year. The oil/sand separator was visually inspected on 2/4/13 and 7/7/13 and was cleaned on 12/20/12. The cleanout was performed by Select Environmental Services. The system continues to be treated with Power Play Active Bacteria bio-reactor as needed.

LITTER CONTROL

BMP DESCRIPTION
Litter control is a management practice that involves educating and training County employees on the proper storage and disposal of all materials found at a County facilities. The goal of a litter control program is to prevent the discharge of trash, debris and other pollutants from County facilities into local waterways and maintain safe and healthy work places. The County adheres to a litter control program at their Public Works Service Centers and administration buildings. Practices include tarp coverings on trucks to prevent wind-blown material and trash cans located conveniently throughout the facilities including employee break areas as well as at fueling islands. The County will implement quarterly inspections at Public Works Service Centers and schedule litter cleanup (as necessary).

ACTIVITIES PLANNED FOR NEXT REPORTING PERIOD
• Update SWMP and BMPs

PROPOSED CHANGE
NONE

PROGRESS DURING CURRENT REPORTING PERIOD
Trash cans located at each of the four County Service Centers at Copeville, Farmersville, Weston and McKinney are emptied daily by Community Service Correction Division (CSCD) personnel and transferred to dumpsters. CSCD personnel also conduct litter pickup daily. Any windblown trash in the vicinity is picked up at that time. The County has a contract with IESI for dumpster pickup and disposal. IESI picks up the dumpsters biweekly. Dumpster lids are kept closed to prevent windblown trash and storm water exposure.

Quarterly inspections for litter control are performed at each Service Center along with BMP inspections for aggregate stockpiles (See BMP GH-13). If excessive trash is observed, it is noted in the Comments section of the BMP Inspection Form and CSCD personnel are instructed to pick up litter at that facility the following day. Inspections at each of the 4 County facility occurred on 9/26/12, 1/10/13, 3/13/13 and 6/20/13. Cleanups are done on a regular basis.

Implementation Activity | Measurable Goal | Completion Date
--- | --- | ---
Quarterly inspection of facilities for litter | Dates of inspections | 8/12/13
| Dates of cleanup (if needed) | |

PROGRESS DURING CURRENT REPORTING PERIOD

The drain pit (grit trap) for the service center car wash was pumped out by Cactus Environmental Services on December 20, 2012. The waste material disposal was handled by Cold Springs Processing in Fort Worth, Texas (TCEQ MSW No. 01225) in accordance with TCEQ regulations. The supervisor for the service center facility performs inspections on a monthly basis. The maintenance log is attached.

**BMP Description**
This practice involves the development of a program to properly store road sand and aggregate. Proper storage and application can prevent the transport of the material with runoff. Stockpiles of sand and other road base materials are located at all four of the County Facilities: the Public Works material storage area behind the County Courthouse in McKinney, the Farmersville Facility, the Weston Facility, and the Copeville Facility. The County will maintain erosion control BMPs (silt fence or socks) around stockpile areas to prevent the transport of material off-site. The County will inspect these BMPs quarterly and replace or repair the BMPs as necessary.

**PROGRESS DURING CURRENT REPORTING PERIOD**

The County maintains a Spill Prevention Control and Countermeasure Plan for Equipment Services at the Public Works Service Center at Wilmeth Road and the Farmersville Facility. The current plans were certified by a Professional Engineer in August of 2009. The required training detailed in the plan educates the County employees on the potential water quality impacts that may result from discharges from these two facilities.

Leak detection tests were conducted on a monthly basis during the reporting year with passing results. Results of leak detection tests are maintained on-site and are available for review upon request.

Canopies were constructed over the fuel storage and dispensing equipment at the Farmersville Facility and the Public Works Service Center as shown in the attached photos.
