-  Airport
-  Railroad
-  Park
-  Water Body

¹All Principal and Major Arterials require at least 120 feet of right-of-way (TXDOT may require more on their roadways). All developments will be required to dedicate their share of the right-of-way when platting new subdivisions. The actual size/number of lanes of the arterial (usually 6 lanes or 4 lanes) will be determined at the appropriate time when the governing agency is developing a specific plan for that roadway.

0 2 Miles
