Influenza Surveillance Report: Collin County*
MMWR Week 18 (May 2 – May 8, 2021)
Influenza Report as of May 17, 2021

Overview

Collin County
- Influenza activity in Collin County is low.
- 0.2% of patient visits to health care facilities were due to influenza-like illness (ILI).
- No influenza-associated pediatric deaths were reported this week. Total this season: 0

Texas
- Influenza activity in Texas is low.
- 1.3% of patient visits to health care facilities were due to ILI, which is below baseline (5.3%).
- No influenza-associated pediatric deaths were reported this week. Total this season: 0

United States
- Influenza activity in the United States is low.
- 1.2% of patient visits to health care facilities were due to ILI, which is below baseline (2.6%).
- This season there have been three novel influenza A viruses reported – one A(H3N2)v virus and two A(H1N1)v viruses.
- No influenza-associated pediatric deaths were reported this week. Total this season: 1.

Influenza Activity

The following tables demonstrate the number of influenza tests performed by healthcare providers and the total number of tests that were positive. The numbers displayed below represent the totals reported by participating healthcare facilities. Table I. displays the number of tests performed and how many of those were positive for the week. Table II. Shows the cumulative totals for the prior weeks and breaks down the current week. Figure I. below displays the number of positive influenza cases for the current 2020-2021 flu season by MMWR week.

Table I. Overview of Individuals Tested for Week 18

<table>
<thead>
<tr>
<th>Total Tests Performed</th>
<th>Total Positive</th>
<th>Percent Positive</th>
</tr>
</thead>
<tbody>
<tr>
<td>161</td>
<td>0</td>
<td>0.0%</td>
</tr>
</tbody>
</table>

*Reportable in the State of Texas: any outbreak or unusual group expression of influenza, novel influenza and influenza-associated pediatric mortality. All other reporting is voluntary.

Please note, some aspects of influenza surveillance may be affected by current COVID-19 response activities. COVID-19 is affecting healthcare seeking behavior which impacts data used for ILI surveillance.
Table II. Influenza Test Results
